Description

The PI6CG33802C is an 8-output, very-low-power PCIe Gen1/Gen2/Gen3/Gen4/Gen5 clock generator. It uses a 25MHz crystal or CMOS reference as an input to generate the 100MHz low-power differential HCSL outputs with on-chip terminations. The on-chip termination can save 32 external resistors and make layout easier. An additional buffered reference output is provided to serve as a low-noise reference for other circuitry.

It uses Diodes' proprietary PLL design to achieve very-low jitter that meets PCIe Gen1/Gen2/Gen3/Gen4/Gen5 requirements. It also provides various options, such as different slew rate and amplitude through SMBUS, so users can easily configure the device to get the optimized performance for their individual boards. The device also supports selectable spread-spectrum options to reduce EMI for various applications.

Note:

1. Spread must be selected OFF or ON with the hardware latch pin. These bits should not be used to turn spread ON or OFF after power up. These bits can be used to change the spread amount, and B1[5] must be set to a 1 for these bits to have any effect on the part. If these bits are used to turn spread OFF or ON, the system must reset.

Crystal Circuit Connection

The following diagram shows PI6CG33802C crystal circuit connection with a parallel crystal. For the CL=8pF crystal, it is suggested to use C1=8pF and C2=8pF. C1 and C2 can be adjusted to fine tune to the target ppm of crystal oscillator according to different board layouts based on the following formular in the Crystal Capacitor Calculation diagram.

Crystal Oscillator Circuit

Crystal Capacitor Calculation

Final choose/trim $C1=C2=2 * CL - (Cb + Cj)$ for the target +/- ppm
Example: $C1=C2=2 * (18pF) - (4pF + 5pF) = 27pF$

Recommended Crystal Specification

Diodes recommends:

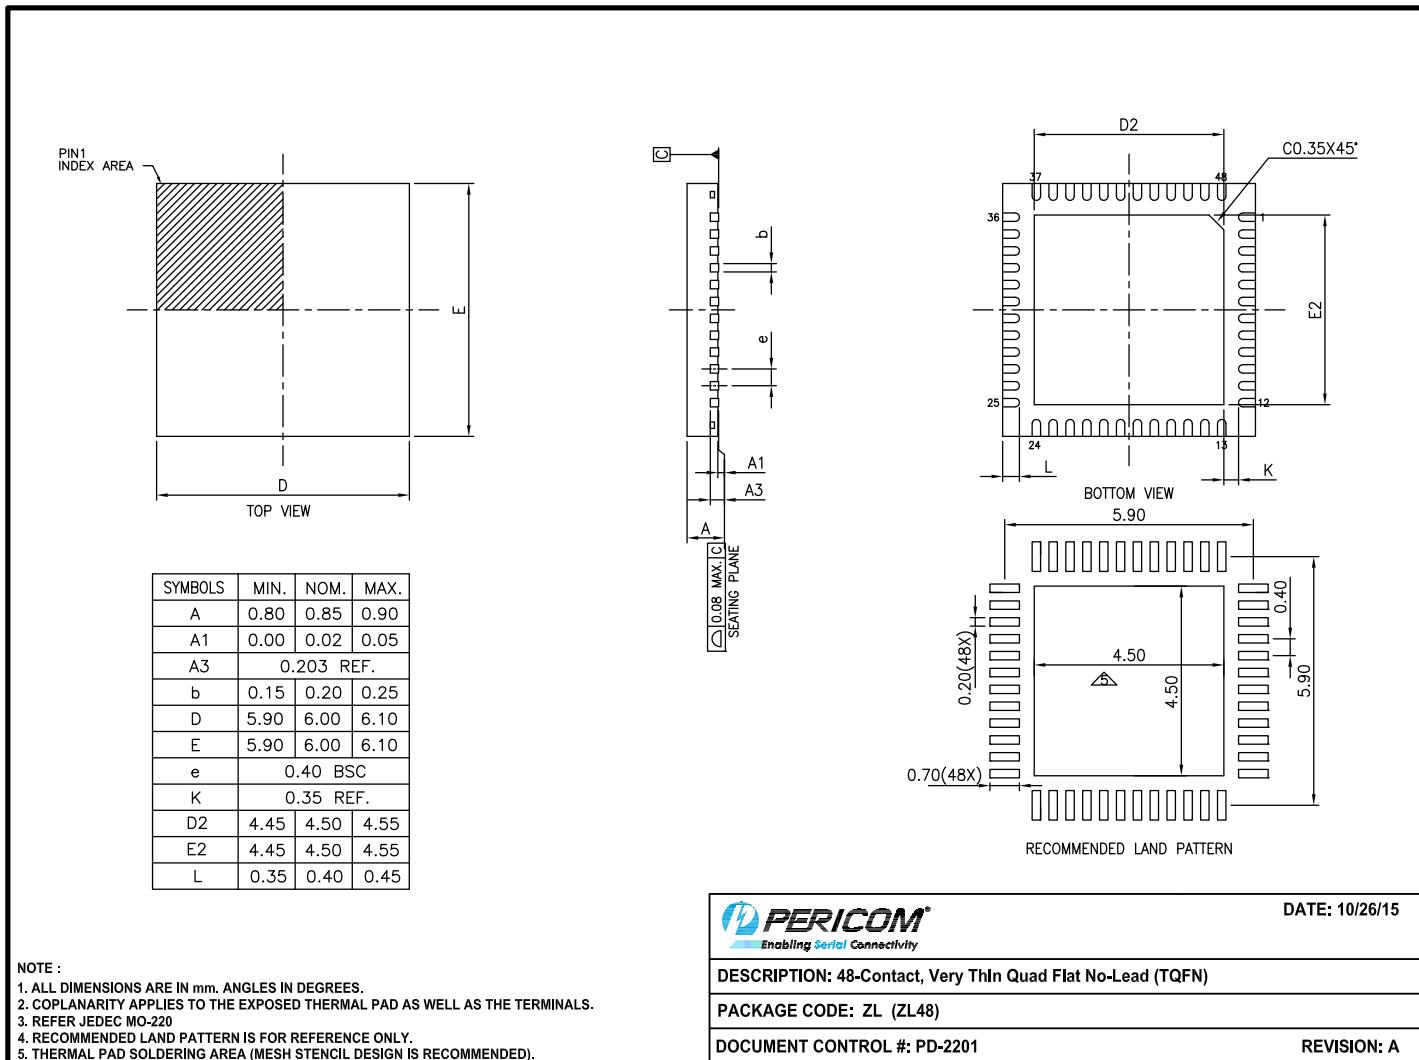

- FL2500217, SMD 3.2x2.5(4P), 25MHz, CL=8pF, +/-20ppm, <https://www.diodes.com/assets/Datasheets/FL.pdf>
- FH2500016, SMD 2.5x2.0(4P), 25MHz, CL=8pF, +/-30ppm, <https://www.diodes.com/assets/Datasheets/FH.pdf>
- FW2500031, SMD 2.0x1.6(4P), 25MHz, CL=8pF, +/-30ppm, <https://www.diodes.com/assets/Datasheets/FW.pdf>
- US2500003, SMD 1.6x1.2(4P), 25MHz, CL=12pF, +/-30ppm, <https://www.diodes.com/assets/Datasheets/US.pdf>
