

ECM & MEMS Microphones

PUI Audio is proud to introduce a new line of high-performance ECM (Electret Condenser Microphone) and MEMS (Micro-Electro-Mechanical Systems) microphones, manufactured outside China. This expanded offering gives customers greater sourcing flexibility while maintaining the exceptional quality, reliability, and acoustic performance PUI Audio is known for.

Applications

- Medical devices from respiratory monitoring to fitness wearables
- Industrial systems: audio sensing in harsh environments
- Security devices: high-SNR input for glass-break and fire detection
- Microphone arrays for beamforming and noise cancellation
- Consumer electronics: earphones, IoT devices, & voice assistants

Be sure to review the [announcement for more information.](#)

Features

- ✓ Unidirectional and Omnidirectional ECMs
- ✓ Analog and Digital Omnidirectional MEMS
- ✓ Wide Sensitivity Range with a strong SNR
