

G3-D CONTROL GRIP

The rugged, ergonomically designed G3-D Control Grip can be configured with a rocker switch or a pushbutton at the top of the grip handle, and an operator presence trigger switch to help prevent inadvertent actuation. Top mount and bottom mount are both available as standard offerings.

The G3-D grip can be assembled with OTTO's JHM joystick, providing a variety of gating options including single axis, dual axis, friction held and omni-directional. Output choices include analog, PWM, USB, CANopen and CANbus.

The G3-D Control Grip works well in industrial, agricultural, mining, utility and construction applications such as aerial work platforms, scissor lifts, bucket trucks, telehandlers, trenchers and track trucks.

Top Mount G3-D with
Rocker Switch and
Operator Presence

Features:

- Operator Presence Option
- Rocker or pushbutton switch options for the top of the handle
- Switches sealed to IP68S
- Top mount or bottom mount
- Can be assembled with an OTTO JHM joystick
- RoHS compliant
