

Han® 3A HMC

Pushing Performance

Description

We are happy to announce an addition to the Han® HMC portfolio.

The Han® 3A housing series is from now on also available in a high mating cycle variant which can perform 10,000 mating cycles. In combination with the already existing Han® HMC contacts and a selection of the standard isolation bodies suitable for 3A housings, we are now able to offer an HMC solution with a very small footprint.

Specs

- >10,000 mating cycles
- Powder coated zinc die-cast
- -40...+125C
- Powder coated zinc die-cast
- Steel lever
- IP65/67
- **Note** – HMC hoods and housings are NOT compatible with standard variants

Markets

- Machinery
- Robotics
- Intralogistics
- Automation

Applications

- Packaging Equipment
- Paper Processing Machines
- Conveyor Systems
- Metal Forming
- Injection Molding
- Test and Measurement Systems

Feature

- Stainless steel roller

Advantage

- Low locking friction values

Benefit

- Increased mating cycles

- 10,000 mating cycles

- Reduced interconnect servicing and replacement

- Reduced total cost of ownership
