

a PennEngineering® Company

Complete Cable Management Solutions for Data Centers

Reliable data processing has Heyco® at its center.

Data Transmission | Power Distribution | HVAC | Data Racks

DATACOM BROCHURE

Future-Proof Your Data Processing Power

The datacom space is changing — and fast.

The widespread adoption of AI is a primary driver of growth in the industry, with millions of servers across the globe now running 24/7 to power the models that fuel AI, requiring more power, larger cables, and heavier-duty heat transfer systems to keep up.

But the global interest in AI isn't the only thing sparking change in datacom. Experts estimate that both AI and non-AI workloads, supported by traditional data centers and hyperscalers, will be key drivers of data center capacity demand growth through 2030, and it won't stop there.

In the next five years, global data center demands are expected to more than triple.

Because of these trends, data centers everywhere are upgrading their processing power and investing in key components that can scale and continue to perform under increasingly strenuous demands.

From liquid-tight cordgrips and conduit to cable ties, sleeving, and solderless connectors, Heyco offers the widest range of standard products, proudly manufactured in America, for improved reliability and efficiency in data transmission, power distribution, HVAC, and data racks. Heyco is dedicated to continuous innovation as we grow and expand our line regularly to accommodate the expanding needs of today's data centers.

Engineering Confidence Into **Every Connection**

As an established partner for some of the world's most advanced data centers, we're proud to deliver end-to-end cable management solutions, expertly engineered for reliability, scalability, and improved performance.

With a century of engineering expertise, uncompromising standards, and a commitment to continuous innovation, we help you keep your systems running and optimized, and the data flowing as a result.

Find the Perfect Part

- Vast range of standard products, ready to sample direct through our website and in stock with your local distributors
- Largest standard offering of UL-listed strain reliefs and 2" to 3.5" plastic cordgrips in the industry
- Flexible customization options to guarantee the perfect fit

Why Partner with Heyco?

- Trusted to deliver precision-engineered, high-quality components
- Pioneering US manufacturing since 1926
- Fast and reliable global distribution

End-to-End Cable Management for the **Next Era of Data Infrastructure**

Data Transmission Enclosures

Wire Management

Sleeving, Wrap & Slit Tubing

Bushings & Plugs

HVAC/Liquid Cooling

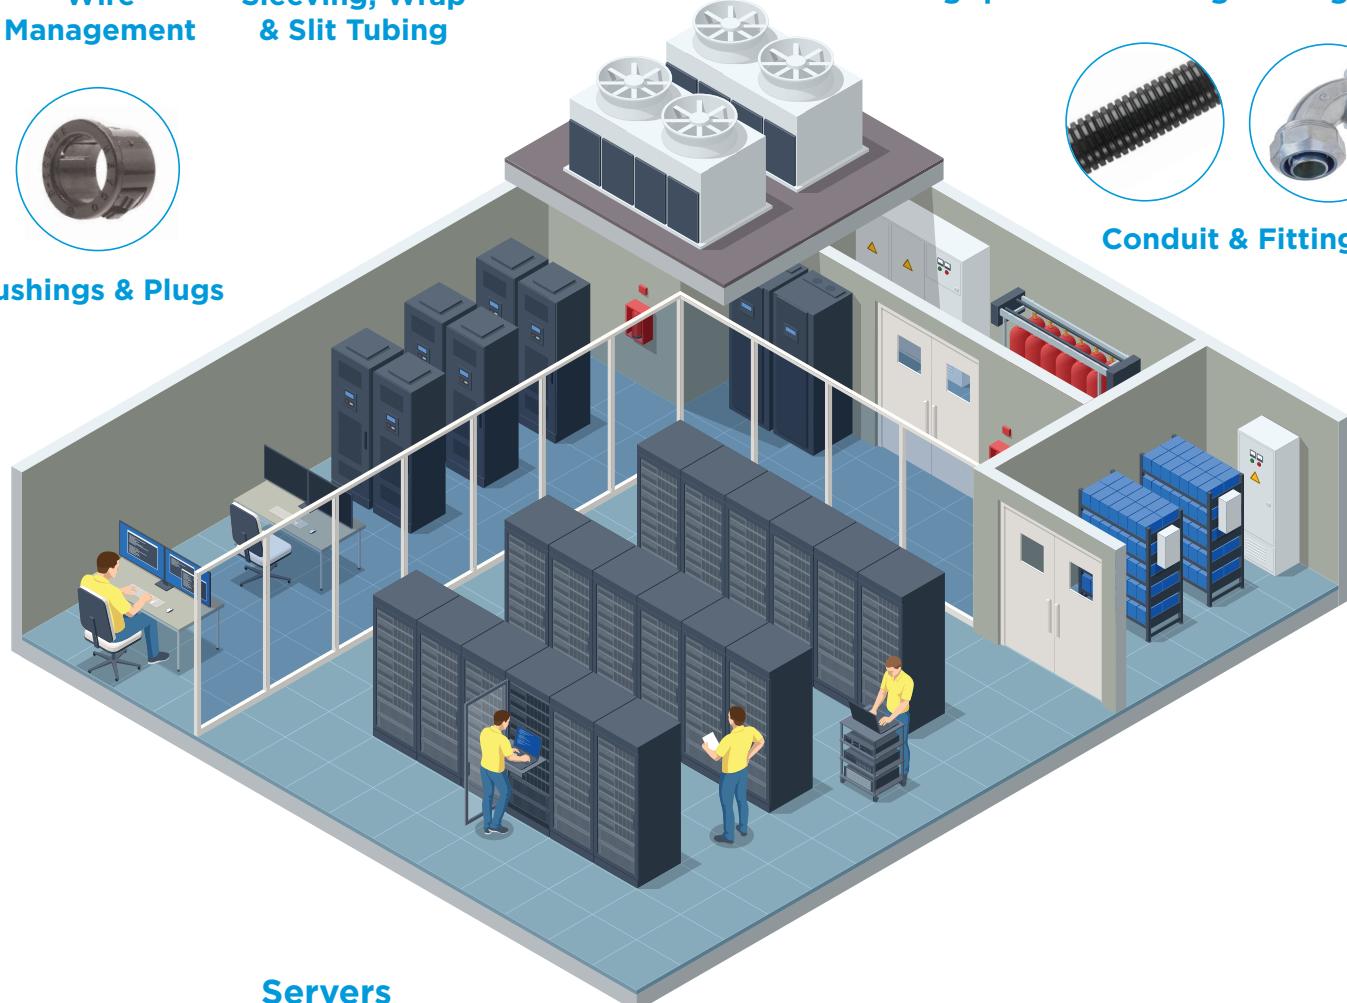

Cordgrips

Bushings & Plugs

Conduit & Fittings

Servers

Cordgrips

Cable Ties & Accessories

Conduit & Fittings

Maximum- Performance Power Distribution at **Any Temperature** **Seal. Shield. Secure.**

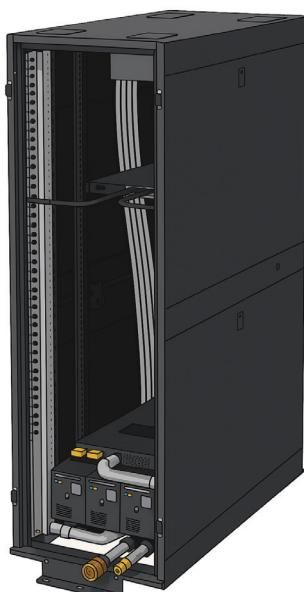

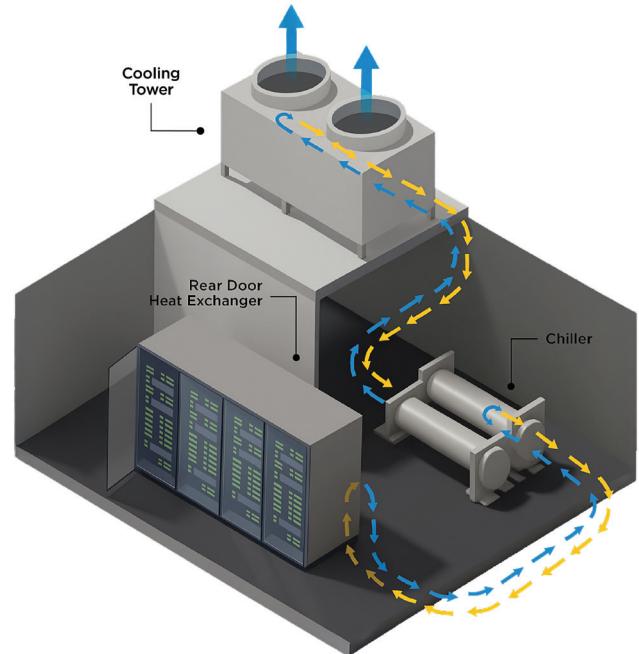

Protect every connection with our US-made solutions engineered for reliability and endurance. Heyco cordgrips, conduit, connectors, plugs, and bushings help ensure the integrity of secure, high-performance data infrastructures.

Built to withstand demanding environments, our connection and protection products maintain enclosure integrity, prevent cable strain, and ensure consistent data flow where precision and reliability matter most.

The **Ultimate** in HVAC, Liquid Cooling Protection, Wire Routing and Connection:

Our liquid-tight cordgrips and conduit solutions safeguard data and power connections in advanced cooling systems. Manufactured to exacting standards, they combine flexibility and durability with proven resistance to corrosion and leaks, protecting uptime and giving you confidence in every connection.

As liquid cooling becomes the standard for high-density data centers, finding components that are built to withstand pressure, temperature fluctuations, and liquid flow is key.

Conduit & Fittings

Cordgrips

Seamless Wire Management & Protection

in Data Transmission Enclosures and Communications Cabling:

Simplify installation, optimize airflow, and maintain signal integrity across every rack and system. Crafted from high-performance materials, Heyco solutions deliver lasting strength and flexibility, ensuring every cable and connection is safely managed, protected, and ready to perform.

Wire Management

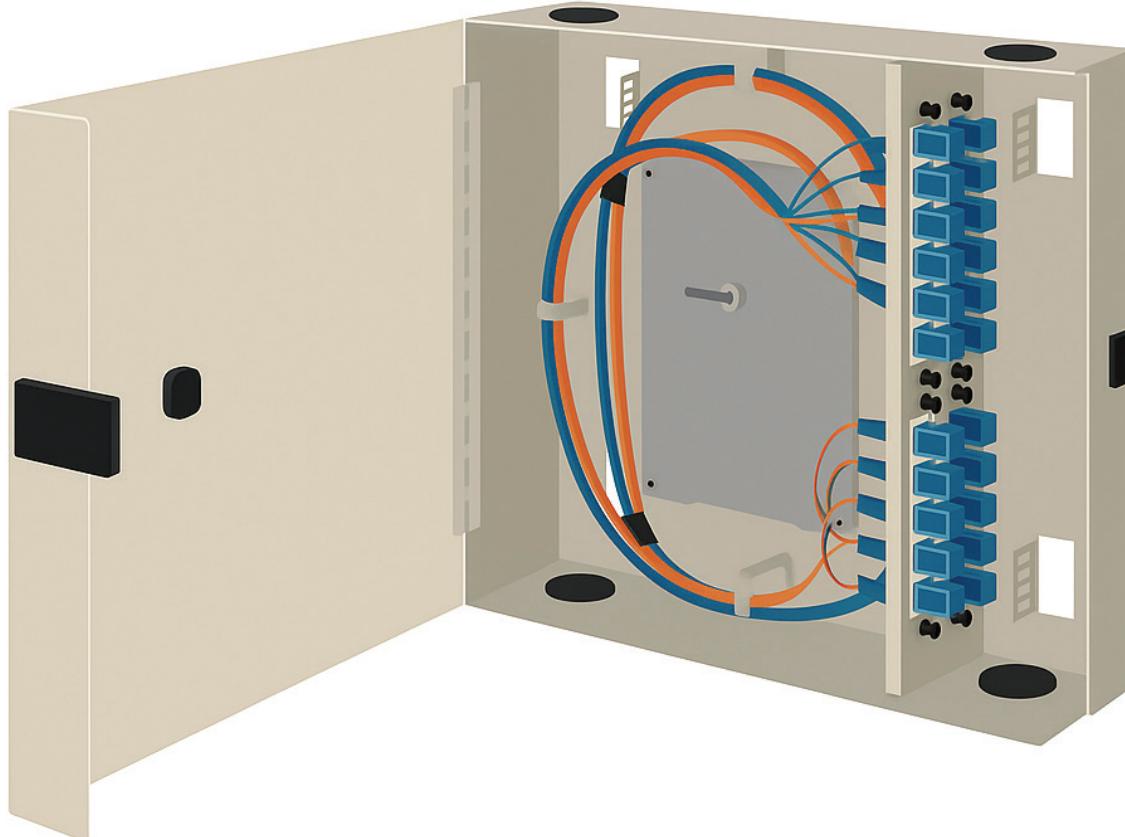

Sleeving, Wrap & Slit Tubing

Conduit & Fittings

Bushings & Plugs

Quick & Efficient **Wire Protection** and Cable Management in Rack Enclosures

Optimize cable management, defend against abrasion, protect signal integrity, and improve thermal performance with Heyco cable ties, braided sleeving, and HF6 conduit — designed to help you keep data moving at full speed.

Cordgrips
