

LattePanda 3 Delta

A Pocket-sized Hackable Computer for Mega Creativity

Brand Profile

LattePanda was founded by three makers in 2015. We provide innovative and accessible SBCs with the latest technology for makers and developers, to help them achieve ideas or projects without threshold.

Over the past seven years, LattePanda has expanded from makers to industry scenarios. Our products have become the key parts of various industrial projects, and fostering a strong developer community.

In near future, LattePanda strives to be the most innovative provider to creating solutions for IoT, edge computing, AI applications.

Brand Profile

2015

LattePanda Team was established. LattePanda V1 came out and caught the attention of users around the world.

2017

Established a high-quality LattePanda community, and attracted **12,000+** registered users worldwide.

2019

Optimized supply chain management and developed new services for the business partners.

2021

The new LattePanda 3 Delta was **624%** funded in the crowdfunding campaign.

2016

LattePanda V1 funded successfully. **4,000+** backers pledged about **\$600,000+** to help bring this project to life.

2018

LattePanda Alpha & Delta came out and raised **\$600,000+** in crowdfunding.

2020

Explored the industrial application of LattePanda.

LattePanda 3 Delta

Faster than Ever

A Pocket-sized Hackable Computer for
Mega Creativity

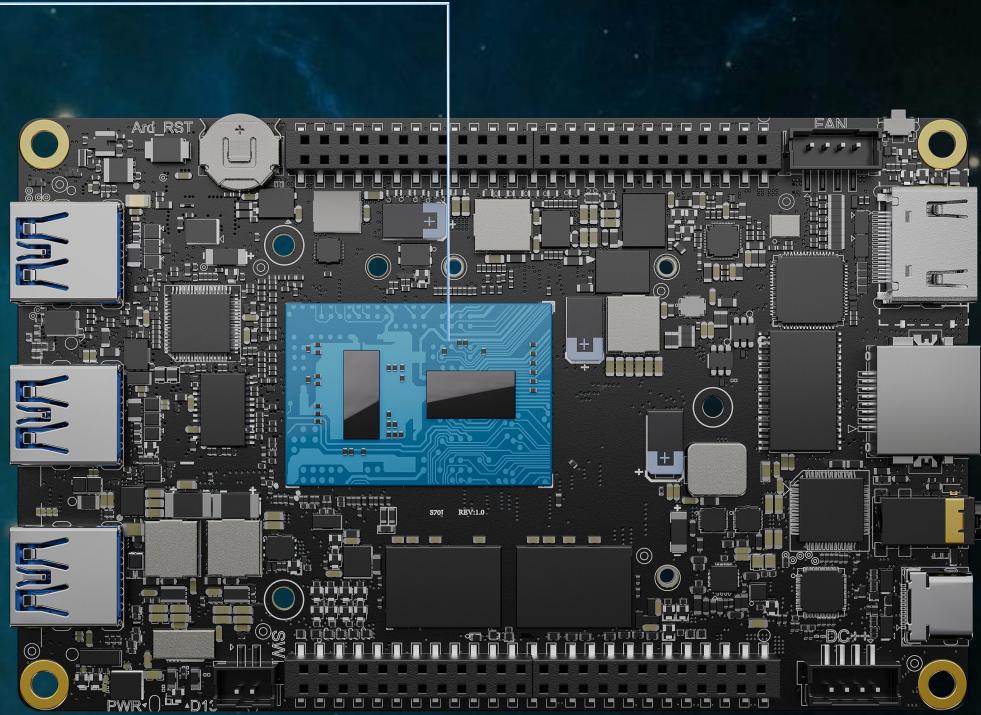

New Arrival

LattePanda 3 Delta - Faster than Ever

CPU - the Intel 11th generation mobile 4-core processor **N5105** with up to **2.9GHz** burst frequency.

2X Faster CPU Performance
3X Faster GPU Performance

*Compare to the previous generation

LattePanda 3 Delta - Faster than Ever

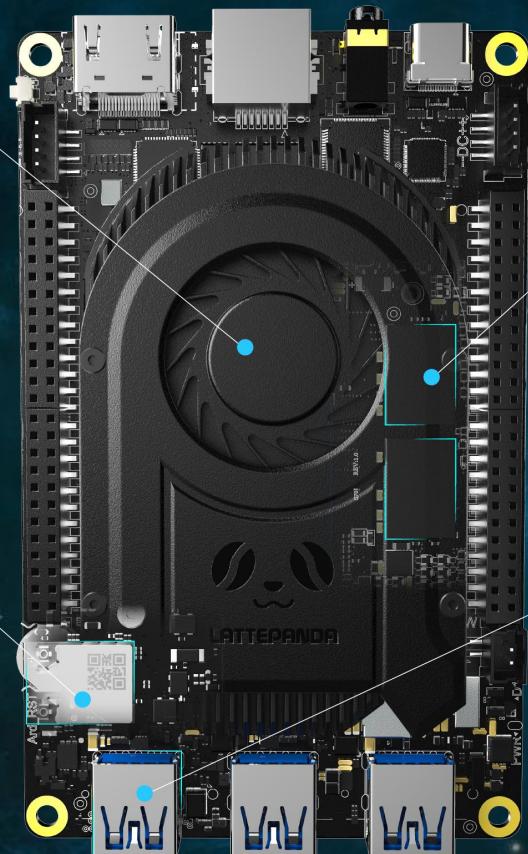

Better cooling sustains
the best performance

50% larger
cooling area

WI-FI 6

Up to 2.4Gb/s throughput

2.7x faster than Wi-Fi 5

2x larger than the previous
generation

8GB MEMORY

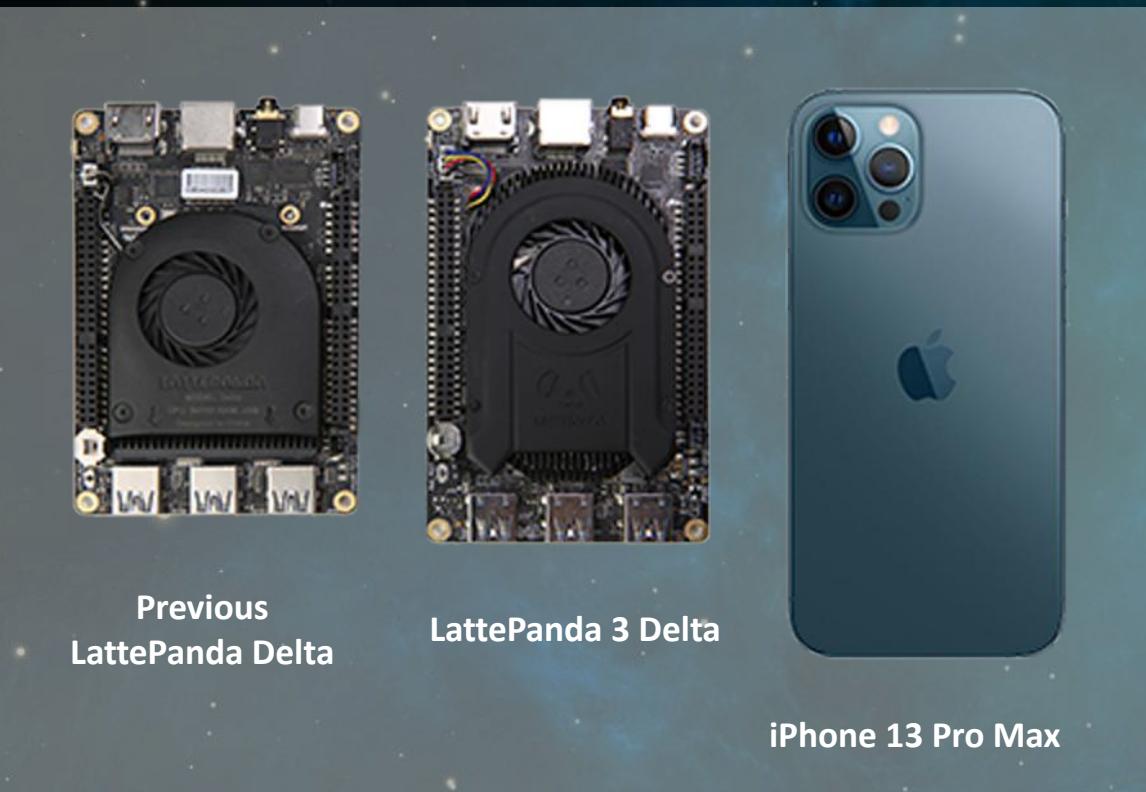

2933MHZ LPDDR4

USB 3.2 GEN2 X1

Up to 10Gb/s data transfer

2x faster than USB 3.2 gen1 x1

LattePanda 3 Delta - Pocket Size

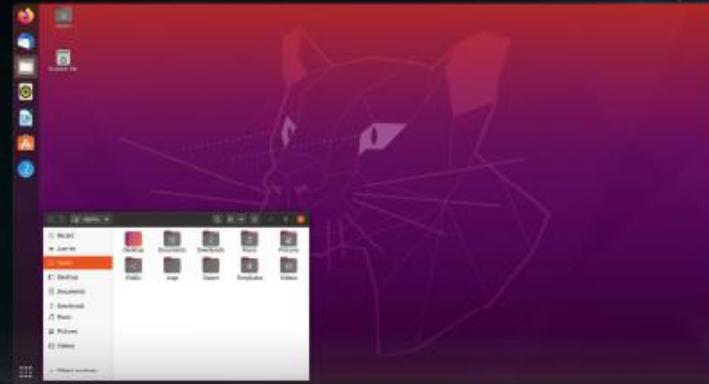

Ultra-thin Design

LattePanda 3 Delta - Windows & Linux Compatible

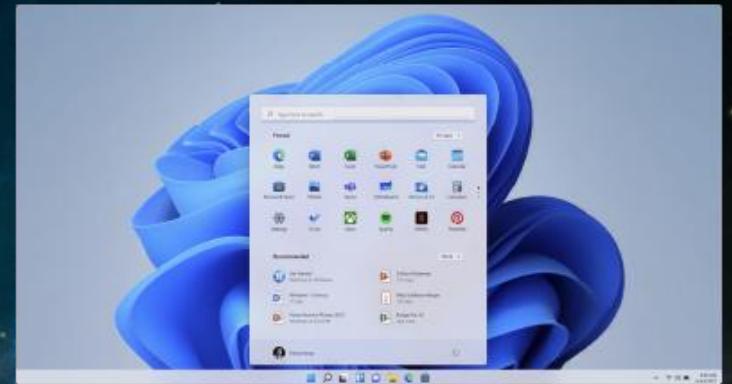

Ubuntu

Windows 10

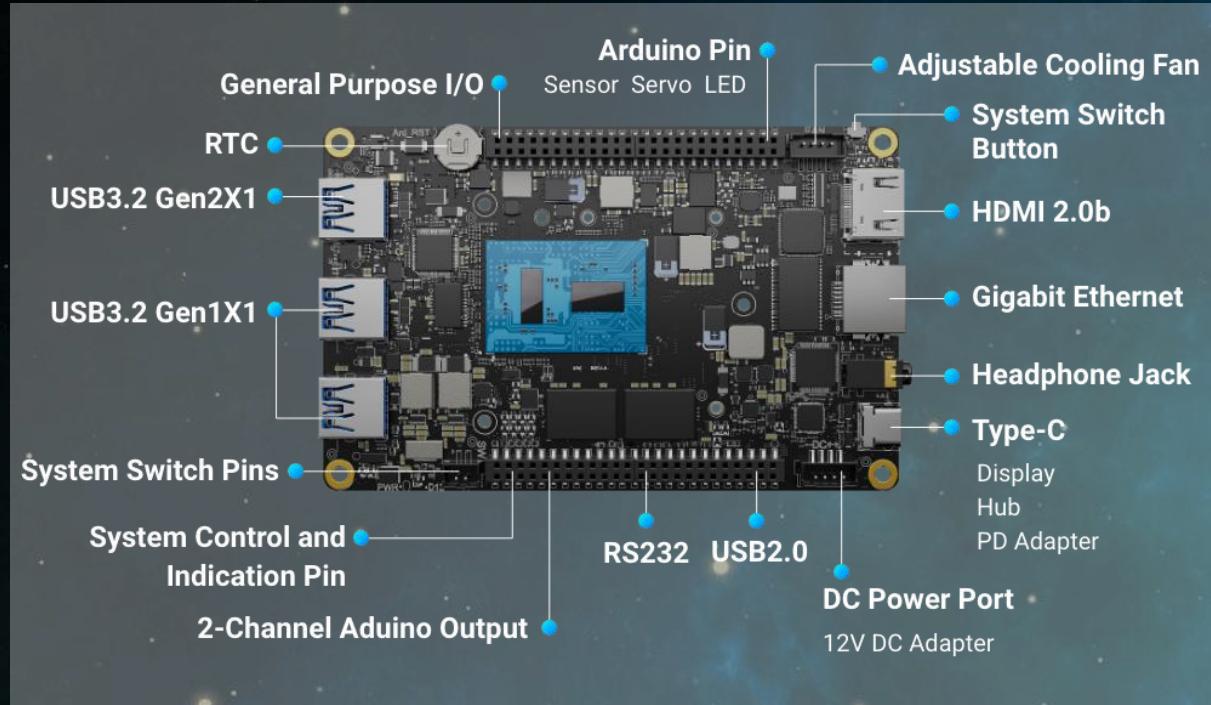

Windows 11

LattePanda 3 Delta supports both Windows 10 and Linux OS.
Moreover, Windows 11 can also be run on it.

LattePanda 3 Delta - True Hackability and Rich Playability

Customer Group

- Young maker group and software developers.
- Mostly applied to instruments and apparatus, telecommunications, or other design and solution companies.
- Due to the universality of Windows and no need of skilled software development capabilities, more and more ordinary users also know about SBCs and LattePanda.
- More and more industry users have also noticed our products and started to explore new application scenarios in various industries.

Applications Scenario

LattePanda can be widely used in artificial intelligence, Internet of Things, smart city, edge computing, smart home, face detection and recognition, artificial intelligence server, intelligent monitoring, voice recognition, cloud machine learning and other fields.

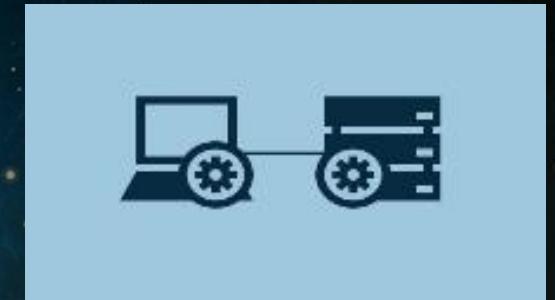

Automotive Electronics/
Central Control Platform

Education

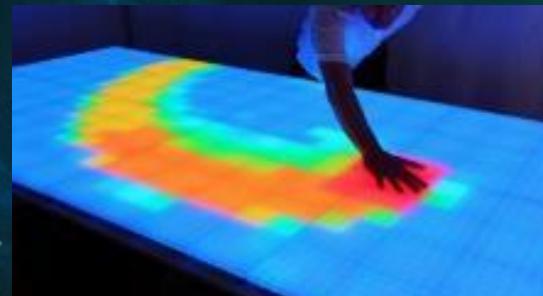

Computer Science

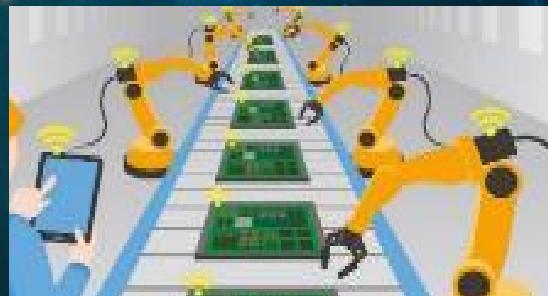

IoT Nodes, Smart Gateways,
local Servers, NAS

Entertainment Device

Interactive Arts

Industrial Robot Control
and Embedded System

Service Robot

Maker Projects

Portable Mini PC

DIY POWERFUL MINI COMPUTER

Small and compact pocket PC, can install windows operating system, various kinds of software and games, all according to personal preferences. It is not only suitable for office and SOHO, but also convenient to carry for business trip or travel.

Gaming Console

Build a portable Emulation / Gaming Handheld using the LattePanda and accessories like the Tian Case and EDP Touch Screen Display.

Industrial Application

Gas/Charging Station Self-service Equipment

It's a kind of sale terminal for fuel stations, which was designed by one of our customers. we can use it for self-service payment and refuelling the car.

Digital Factory

With the trend of developing intelligent factories, the demand for data visualization is increasing day by day. Production line data reports require more immediacy and readability.

Service Robot

The development of service robots makes it easier for businesses to provide customized services to meet customer needs.

Amusement Machine

- There is a huge demand for equipment in places like casinos and amusement machine rooms.
- Has good cost performance under the premise of stable operation.

Industrial Application

POS Machine

Can be widely used in shopping malls, retail stores and other places.

Stage Light Tracking System

Stage tracking systems have improved performances in the traditional entertainment and audiovisual industries.

Intelligent Scientific Instrument

Automatic processing of instrumental results such as cell quantity statistics.

Automobile Center Console System

The upgrade of Automobile Center Console system, rich software ecology and expansibility.
