

MT8390 Evaluation Kit User Guide

Version: 1.4
Release date: 2026-03-16

Use of this document and any information contained therein is subject to the terms and conditions set forth in Exhibit 1. This document is subject to change without notice.

Version History

Version	Date	Description
0.1	2023-03-08	Draft Release
1.0	2023-09-28	- Modify the Architecture and Block Diagram - Add MMD layout dimension - Add Power rail table. - Add the D6 camera board - Move and modify for Section 2.8, EVK Debug - Add Section 6 for software - Add 6.3.1: To Flash IoT Yocto, and 6.3.2: To Flash Android - Modify Power Distribution - Add Errata
1.1	2023-11-22	- Modify the PCM pin definition from MT7663 to the SOC Table 8-1 - Modify Table 2-3 Power Rail for MF5721FP/A to MA5721FP/A
1.2	2024-03-15	Add Errata for SPI NOR Flash
1.3	2024-05-14	Updated 6.1.3 Setup Tool Environment
1.4	2026-03-13	- Modify filename - Part number alignment

1.3 Feature Summary

- MediaTek CPU (MT8390)
- MediaTek PMIC (MT6365)
- 4GB + 4GB LPDDR4X RAM (Micron MT53E1G32D2FW-046 IT: B)
- 64GB eMMC5.1 x 1 (WD SDINBDG4-64G-XI2)
- 2.0mm DC Jack x 1 (for 12V DC Input)
- Micro SD Card Slot x 1
- Push Button x 4 (Power, Reset, Download and Home Key)
- LED x 4 (Power, Reset, System on and Charging Status)
- 4-Lane DSI x 2
- eDP x 1
- HDMI2.0 x 1
- 10/100/1000M Ethernet x 1 (Shared with DPI Signal)
- USB Device Port x 1 (Micro USB Connector)
- USB Host Port x 1 (Type-C USB Connector)
- 3.5mm Earphone Jack x 1 (with Microphone Input)
- 3.5mm Line Out Audio Jack x 1
- Analog Microphone x 1
- Digital Microphone x 2
- UART Port x 3 for Trace Log with a USB to UART Bridge IC (Micro USB Connector x 3)
- I2C Capacitive Touch Pad
- 4-Data Lane CSI x 2
- M.2 Slot x 2 (for AzureWave AW-XB468NF Wi-Fi Module 、 AW-CB451NF Wi-Fi Module)
- 40-Pin 2.54mm Pin Header x 1 (for Raspberry Pi like I/O Interface)

1.4 MMD Layout Dimension

- MT8390 + 4-channel DRAM : $30 \times 40 = 1200\text{mm}^2$
- PMIC MT6365 : $30 \times 20 = 600\text{mm}^2$
- PMIC MT6319 : $7 \times 17 = 105\text{mm}^2$

Figure 1-2. MMD Layout Dimension

2 Introduction

The Genio 700 EVK board integrates the MediaTek MT8390 processor, 64-bit LPDDR4X memory, eMMC, a Power Management IC (MT6365), and a Wi-Fi/BT M.2 module.

The package contains a Genio 700 EVK Main board, 7" LCD panel, and a stand set for 7" LCD panel.

Figure 2-1. Genio 700 (MT8390) EVK Board System Setup

Figure 2-2. Genio 700 (MT8390) EVK Board I/O Overview

Table 2-1. Contains in The Box

No	Part Number	Item Name	Description	Quantity
1	IoT-Genio 700 EVK-P1V3	Genio 700 EVK Main Board		1
2	IoT-CAM-DTB-D1V2-D2	D2 Camera Board	Camera Daughter Board Using the IMX214 Image Sensor	1
3	IoT-CAM-DTB-D1V3-D6	D6 Camera Board	Camera Daughter Board Using the AR0830 Image Sensor	1
4	KD070FHFID015-C021A	7" LCD Panel	LCM Module	1

Buck for eDP	RT5753AHGQWA	3.3
Buck for Camera	RT5753AHGQWA	3.3
Buck for Raspberry Pi	RT9078N-08GJ5	3.3
Boost for USB power	RT4812GJ8F	5
LDO for DRAM	MA6680P/A	1.8

2.1 CPU (MT8390)

MediaTek MT8390 processor integrates dual-core ARM® Cortex-A78, 2.2GHz processor and six-core ARM® Cortex-A55 2.0GHz MPCore processor equipped with the NEON engine offers processing power necessary to support the latest OpenOs along with its demanding applications such as web browsing, email, GPS navigation, and games.

The features of the MT8390 processor include the following:

- Octa -Core
- 2 x ARM® Cortex-A78 Operating at 2.2GHz with each core 64KB L1 I-Cache, 64KB L1 D-Cache and 256KB L2 Cache
- 6 x ARM® Cortex-A55 Operating at 2.0GHz with each core 32KB L1 I-Cache, 32KB L1 D-Cache and 128KB Cache
- Shared 2MB L3 Cache
- NEON Processing Engine
- ARM TrustZone Security
- DVFS Technology with Adaptive Operating Voltage from 0.55V to 0.973V
- Tensilica VP6 processor with AI Accelerator (AIA or MDLA– MediaTek Deep Learning Accelerator)
- VFGBA-1204 Package

2.2 Power Management IC (MT6365)

MediaTek MT6365 power management IC is a programmable power management IC that integrates 9 buck converters and 33 LDOs to provide all the power rails required by the SoC and peripherals.

MT6365 adopts the SPI interface and two SRCLKEN control pins to control buck converters, LDOs, and various drivers; it provides enhanced safety control and a protocol for handshaking with the processor, MT8390.

For system management, it provides the following features

- 9 Buck Converters
- 33 LDOs
- Precision voltage, temperature, and current measurement fuel gauge
- 26MHz External Crystal for System Clock
- 32.768KHz RTC Oscillator for System Timing
- Watchdog Reset
- Over-current and Thermal Overload Protection
- OVP, UVLO Function
- WFBGA-203 Package

Note: For information about the PMIC MT6365 software naming conventions, please refer to FAQ30421 on MediaTek Online.

2.3 DRAM (Micron MT53E1G32D2FW-046 IT: B)

Genio 700 (MT8390) EVK has two 4GB LPDDR4X memory with the following features.

- Dual Channels with 16-bit Data Bus Width
- Supports self-refresh/ partial self-refresh mode
- Supports a dual-rank memory device

2.4 eMMC Storage (WD SDINBDG4-64G-XI2)

A 64GB eMMC 5.1 WD SDINBDG4-64G-XI2 is used for code and data storage, via MSDC0 interface of the baseband processor MT8390, which features an 8-bit wide data bus.

2.5 M.2 Wi-Fi/Bluetooth Module (AzureWave AW-XB468NF)

MediaTek MT7921L is in the AzureWave AW-XB468NF M.2 Module. It supports the following features:

- M.2 2230 Wi-Fi Module with Key A-E
- MediaTek MT7921L Wi-Fi Chip
- PCIe/USB Interface
- Wi-Fi 802.11 a/b/g/n/ac/ax
- Dual Band 2T/2R MIMO
- Bluetooth 5.2
- Security: WPA WPA/WPA2/WPA3 Personal, WPS 2.0, WAPI
- Integrated LNA, PA, and T/R Switch

2.6 Power on the Genio 700 (MT8390) EVK

Power on the Genio 700 (MT8390) EVK board by following these steps.

- Step 1: **You must install the camera board on the Genio 700 (MT8390) EVK.**
(If the camera app disappears from the desktop of an Android OS, please refer to Chapter 7 of the Appendix to learn how to fix it.)
- Step 2: Connect UART0 (CN3200) to the computer via a USB cable. (If you want to see the logs).
- Step 3: Plug in the DC 12V power adapter.
- Step 4: Long Press PWR button for more than 3 seconds

You will see the boot-up picture on the LCD display and some trace logs come out from UART0.

2.7 EVK Debug

- Micro USB (CN3200) output UART log
- Please install the FT232RL driver

Figure 2-3. Debug Port

- Check PC USB port could recognize the UART device
- Setting serial line (ex. COM57) , serial speed to 921600, choose connection type to serial and press OPEN on putty for Log (Example on Putty)

Figure 2-4. UART port setting

Figure 2-5. Log (For reference)

3 Interfaces and Connectors

3.1 Genio 700 (MT8390) EVK Board I/O Connectors

Table 3-1. Main Board Connectors

Interface	Location	Note
DC Jack	CN1000	12V DC Input
System Power Indicator	D1002	Green LED
Reset Indicator	D3200	Green LED
System On Indicator	D1003	Red LED
Charging Status Indicator	D1001	Green LED
Power On Button	SW3200	
Download Button	SW3201	
Home Key Button	SW3202	
Reset Button	SW3203	
USB Device	CON480	USB2.0 Port
USB3.1/DP MUX	CON490	USB3.1 Port/DP Display Port(MUX)
UART0	CN3200	Debug Port
UART1	CN3201	Debug Port
UART2	CN3202	Debug Port
Micro SD Card Slot	CON420	
DSI	J2300	7" LCM0
DSI	J2400	7" LCM1
Touch	CN2300	7" Touch0
Touch	CN2400	7" Touch1
eDP	J3700	15.6" LCM
CSI0	CN2900	Camera 0 Interface
CSI1	CN2901	Camera 1 Interface
HDMI	J2500	HDMI Type-A Connector
Ethernet	J3900	10/100/1000M Ethernet Transceiver
M.2 Slot Key E	J4000	AW-XB468NF(MT7921L) Wi-Fi Module
Raspberry Pi like I/O	J4200	
JTAG	J3200	
Earphone Jack	J2601	
Line Out	J2600	
Battery Connector	J1002	
Analog Microphone	MIC2702	
Digital Microphone 0	MIC2700	
Digital Microphone 1	MIC2701	

3.2 System Power Paths

There are two power supply paths for the system. One is through a buck converter (Richtek RT6276A), which converts 12V (DC Jack) to 4.2V (V_{SYS}). This path supports applications that do not have Li-Polymer batteries.

The other method involves a battery charger IC (Richtek RT9471D). This path supports applications utilizing Lithium Polymer batteries.

Figure 3-1. System Power Path

3.2.1 Charger Power Source

The user can choose between USB Type-C or DC 12V to power the charger ICs via J1003. Usually, either one of them can meet the requirements for most cases.

Current Rating	Charger Power Source
3 Ampere	1-2: USB Type C J1003

Figure 3-2 Jumper Selection for Charger Power Source Input Path

3.2.2 System Power

There are two power paths that can be selected by J1000 and J1001 (at the same time) for system power VSYS

Current Rating	System Power
6 Ampere	1-2: Buck  J1000 J1001
6 Ampere	2-3: Charger  J1000 J1001

Figure 3-3. Jumper Selection for System Power

3.2.3 Raspberry Pi Power 3V3

Before using the Raspberry Pi-like connector, the J4201 needs to have a jumper plugged in to get power.

Current Rating	Raspberry Pi Power 3V3
0.3 Ampere	1-2: Raspberry Pi Power 3V3  J4201

Figure 3-4. Jumper Selection for Raspberry Pi Power 3V3 Input

3.2.4 Auto Power On by plugin of AC Adaptor

Before using the Auto Power On function by plugging in the AC adaptor, the J3001 needs to have a jumper plugged in.

Current Rating	Auto Power On by plugin of AC Adaptor
0.1 Ampere	1-2:Auto Power On by plugin of AC adaptor  J3001

Figure 3-5. Jumper Selection for Auto Power on by plugin of Adapter

3.3 I/O Interface

LED Indicators

There are four LED indicators.

Table 3-2. LED Indicators

LED Indicators		Location	Color	Note
System Power Indicator		D1002	Green	LED is on when system power in.
Reset Indicator		D3200	Green	The LED is on when the reset key is pressed.
System On Indicator		D1003	Green	The LED is on when the system is on.
Charging Status Indicator		D1001	Red	The LED is on while charging.

UART

There are three UART (UART0、UART1 and UART2) consoles with USB to UART Bridge ICs (FT232RL) on Genio 700 (MT8390) EVK board. Users can use these consoles for debug purpose. The connectors are Micro USB type.

- Supports word lengths from 5 to 8 bits with an optional parity bit and 1 or 2 stop bits
- Supports baud rates from 110 bps up to 961,200 bps
- FTDI USB to UART Bridge FT232RL

Table 3-3. UART Ports

UART Port	I/O Connector	Purpose
UART0	CN3200 (Micro USB)	Debug
UART1	CN3201 (Micro USB)	Debug
UART2	CN3202 (Micro USB)	Debug

Configure UART2 Port

Two Jumper (J4202 and J4203) are used to select which UART2 connect to: Micro USB2 (CN3202) or the Raspberry Pi connector (J4200).

Schematic	Description
[32] USB_URXD2 >> 1 RasPi_URXD2 >> 3 2 >> UART2_RXD [6,42] 3 >> UART2_RXD [6,42]	(1) Jumper @ 1-2, UART2 = USB
[32] USB_URXD2 >> 1 RasPi_URXD2 >> 3 2 >> UART2_RXD [6,42] 3 >> UART2_RXD [6,42]	(2) Jumper @ 2-3, UART2 = Raspberry Pi

Figure 3-6. Configure UART2 Ports

I2C

- Seven I2C buses (I2C0 to I2C6)
- Supports Master Mode Only
- Adjustable clock speed for LS/FS/FS+ mode operation
- Supports 7-bit address

Table 3-4. I2C Bus

I2C Bus	Purpose	Note
I2C0	Capacitive Touch Controller	Goodix GS9271
	Raspberry Pi I/O	
I2C1	Battery Charger	RT9471D
	Battery Charger	RT9759
	Buck Convertor	MA5721
	USB Type C MUX	IT5205FN/BX
I2C2	Audio DTB Connector	
	Raspberry Pi I/O	
I2C3	Capacitive Touch Controller	Goodix GS9271
	Camera Module CSI1	
I2C4	USB PD Controller	RT1715
I2C5	Camera Module CSI0	
I2C6	Camera Module CSI0	

SPI

- Support Master/Slave mode
- One chip select output

PWM

- PWM supports old mode and FIFO mode
- The frequency can be set from 0Hz to 39MHz

Raspberry Pi like I/O Interface

The pin definitions are as follows:

Table 3-5. Pin Assignments of the Raspberry Pi like I/O Connector

Pin #	Description	Note	Pin #	Description	Note
1	3.3V		2	5V	
3	SDA2	GPIO60	4	5V	
5	SCL2	GPIO59	6	GND	
7	IO39		8	TXD2	GPIO35
9	GND		10	RXD2	GPIO36
11	IO0		12	PCM_CLK	GPIO121
13	IO37		14	GND	
15	IO41		16	IO111	
17	3V3		18	IO40	
19	SPI_MO	GPIO81	20	GND	
21	SPI_MI	GPIO82	22	IO38	
23	SPI_CLK	GPIO80	24	SPI_CS	GPIO79
25	GND		26	IO90	
27	SDA0	GPIO56	28	SCL0	GPIO55
29	IO1		30	GND	
31	IO26		32	PWM0	GPIO29
33	PWM1	GPIO30	34	GND	
35	PCM_SYNC	GPIO122	36	IO76	
37	IO28		38	PCM_DI	GPIO124
39	GND		40	PCM_DO	GPIO123

Note:

- VDD_5V power can provide 5V/2A maximum but share with Camera 、HDMI 5V output
- EXT_3V3 power can deliver 3.3V/300mA but share with Audio DTB 、DP MUX and HDMI CEC
- Black words are ground pins
- Red words are power pins
- Green words are special function pins
- Blue words are GPIOs
- Pink words are pins, which multiplex with other functions

3.4 MicroSD Slot

The Genio 700 (MT8390) EVK board has one MicroSD slot. It uses the MT8390 MSDC1 interface and supports the following features.

- Default Speed Mode
- High Speed Mode
- SDR12 Mode
- SDR25 Mode
- SDR50 Mode
- SDR104 Mode
- DDR50 Mode
- Support 1bit/4bit SD Bus Width

3.5 Power and Function Key Interface

12V power is supplied to the system through a 2.0mm DC Jack. The power-on button and Reset button on the evaluation board are used to turn on and reboot the system. The Home and Download buttons make operation easier.

3.6 USB Device

The Genio 700 (MT8390) EVK board has one USB Device port (CON480), which can be used for downloading and ADB debugging, with a Micro USB connector.

Table 3-6. USB feature in Genio 700 (MT8390) EVK

USB Ports 0	SW support mode	
	Host mode	Device mode
USB2.0	Support	Support

USB Ports 1	SW support mode		Remark
	Host mode	Device mode	
USB3.1 Gen1	Support	Not Support	EVK with Hub
USB2.0	Support	Not Support	EVK with Hub

USB Ports 2	SW support mode		Remark
	Host mode	Device mode	
USB2.0	Support	Not Support	EVK with Wi-Fi

3.7 USB Host

The Genio 700 (MT8390) EVK board has one USB Host port (CON490) for USB device connection, with a Type-C USB connector.

3.8 Audio Interface

The Genio 700 (MT8390) EVK board provides a 3.5mm earphone jack (with a microphone input) and another 3.5mm audio jack for Line Out (no audio amplifier is built-in).

3.9 Microphones

The Genio 700 (MT8390) EVK board was designed with one analog microphone (Merry MMA102-004) and two digital microphones (Merry MMD300-007).

Table 3-7. Microphone Input

Location	Type	Note
MIC2700	Digital Microphone 1	To Processor MT8390
MIC2701	Digital Microphone 2	To Processor MT8390
MIC2702	Analog Microphone	To PMIC MT6365

3.10 MIPI DSI Interface

Genio 700 (MT8390) EVK board provides one 4-lane MIPI DSI interface. A StarTek LCM (KD070FHFID015-C021A) with touch pad is provided in the box. The I2C capacitive touch controller is Goodix GT9271.

- Up to 1.2Gbps for 1-Data Lane
- Pixel format of RGB565/RGB666
- Supports D-PHY version 1.1

3.11 MIPI CSI Interface

The Genio 700 (MT8390) EVK board provides two 4-lane CSI interfaces, the CSI interface operates up to a maximum bit rate of 1.5Gbps per lane. Camera sub-boards are connected through a Molex 877159006 connector.

3.12 Ethernet Interfaces

The Ethernet RGMII interface shares some pins with the DPI interface. Some configurations should be done before booting up

- Operate with an external Ethernet PHY (Realtek RTL8211FI-CG)
- Dynamically configurable to support 10/100/1000M with RGMII
- Optional magic packet detection
- EEE (Energy Efficient Ethernet) MII signaling according to the IEEE 802.3az specification
- RJ-45 Ethernet connector with a transformer and LEDs in it

3.13 HDMI Port How to Switch between DPI and Ethernet Interfaces

Genio 700 (MT8390) EVK board provides an HDMI port, users can connect external displays. The HDMI encoder of the processors MT8390 generate HDMITX format data base on HDMI Specification 2.0b. which support max. frequency up to 594Mhz (4096x2160p@60Hz 8-bit mode)

The HDMI port also supports HPD, EDID, HDCP 2.3, and 3D HDMI functions.

3.14 Antenna Connector

Genio 700 (MT8390) EVK board has three SMA connectors. Users can connect them via an SMA antenna. At first, three IPEX RF cables must be connected to the Wi-Fi module and the IPEX connectors (CON4000, CON4001, and CON4002). These antennas are designed for the Azuwave M.2 (MT7921L) Wi-Fi module

Table 3-8. SMA Antenna

Location	Band	Note
J4002	2.4GHz / 5GHz	Wi-Fi / BT
J4003	2.4GHz / 5GHz	Wi-Fi / BT
J4004	2.4GHz / 5GHz	Wi-Fi / BT

3.15 How to Switch between DPI and Ethernet Interfaces

DPI and Ethernet RGMII interfaces share some GPIO pins. These two functions cannot exist simultaneously. Reflash code and reboot system might be necessary when you switch between the interfaces. The zero resistors are used to switch these two interfaces, the default configuration is Ethernet.

Table 3-9. Pin Mux for DPI and Ethernet RGMII Interface

MT8390 GPIO Table	Ethernet RGMII Net Name	OR Resistor	NM Resistor	DPI	NM Resistor	OR Resistor
GPIO147	GBE_COL	R4401	R4404	DPI_HSYNC_DTB	R4401	R4404

4 Camera Daughter Board

There are two camera boards incorporated with the Genio 700 (MT8390) main board: the D2 and D6 camera boards.

Table 4-1 Camera Board Differences

	D2 Camera Board	D6 Camera Board
Image Sensor	IMX214-0AQH5-C	AR0830
Output Format	RAW	RAW or YUV (Embedded ISP) (Setting by jumper)

Table 4-2 Collocation of Camera Board and CAM Connector

	D2 Camera Board	D6 Camera Board
CSI0	O	O
CSI1	O	O

Note: "O" means the camera board can be used in this CAM connector, "X" means it cannot.

Figure 4-1. D2, D6 installation

The D2 camera Board integrates with a SONY IMX214-0AQH5-C image sensor chip, which is a high-performance camera image processor with rich features.

Figure 4-2. D2 Camera Board

4.1.1 Key Feature and Block Diagram

- Supports a 4-Lane MIPI CSI interface and connects with the main board through a 36-pin Gold-Finger. It integrates a 1.0V LDO circuit for the camera's digital power supply, a 2.8V LDO circuit for the camera's analog power supply, and a 1.8V LDO circuit for the camera's I/O power supply.

Figure 4-3. Block Diagram of D2 Camera Board

4.2 D6 Camera Daughter Board

The D6 camera Board has two MIPI CSI paths, one connecting directly to the processor (MT8390) on the main board, and another connecting to the main board through an ISP (On-Semiconductor AP1302CSSL00SMGA0-DR). These two MIPI paths are switched by a MIPI multiplexer (TI TS3DV642RUARQ1).

Figure 4-4. D6 Camera Board

4.2.1 Key Feature and Block Diagram

- Support 4-Lane MIPI CSI Interface and connect with the main board through a 36-pin Gold-Finger
- Supports the camera module with/without ISP (On-Semiconductor AP1302CSSL00SMGA0-DR)
- 8M pixel camera modules (VF08001 with ON Semiconductor CMOS image sensor AR0830)
- Since there is only one CSI interface on the main board, the D6 Board can support two camera modules, with ISP and without ISP, switched by a MIPI multiplexer (TI TS3DV642RUARQ1)

Figure 4-5. Block Diagram of D6 Camera Board

4.2.2 Configure D6 Camera Board

5 Power Distribution

5.1 Power Distribution

Figure 5-1. Power Distribution

6 Software

- Genio 700 (MT8390) EVK is supported by two different software stacks: Android and Yocto. The pre-installed software for the Genio 700 (MT8390) EVK is Android.
- Another software stack, IoT Yocto, is also provided as a separate download. The following sections describe how to build, obtain, and flash the images for the Android and Yocto systems, respectively.

6.1 Android

6.1.1 Android Software Project and Configuration

Table 6-1. Android Project name and Configuration

Project Name	Configuration
AIOT8390P5_64_BSP	IoT EVK+MT7663
AIOT8390P6_64_BSP	IoT EVK+MT7921

6.1.2 How to Get an Android Software Image

Please contact with your VAR, Distributor, MediaTek FAE.

6.1.3 Setup Tool Environment

Download the latest USB driver (Driver_Auto_Installer)

from Mediatek Online:

<https://online.mediatek.com/apps/tool?id=83013128040570&action=download>

or from the IoT Genio Developer Center:

[Android - USB Driver Assistant \(Driver Auto Installer EXE\)](#)

Install Fastboot and ADB Device USB Driver on your Windows environment.

Driver_Auto_Installer(Official)_ALPS > Driver_Auto_Installer_SP_Drivers_20230214				
名稱	修改日期	類型	大小	
DriverInstall.exe	2023/2/14 下午 04:12	應用程式	9,312 KB	

6.1.4 Android Software Image Flash method

The following steps can reflash the system codes of the Genio 700 (MT8390) EVK board.

1. Connect the ADB port to the PC via a Micro USB (CON480)
2. Execute the MediaTek Flash Tool
3. Select the proper Download XML file
4. Select the download mode (“Firmware Upgrade” is preferred.)
5. Start download by pressing the button of “Download”
6. Plug in the DC power cord; the downloader will start

Note:

If the downloader does not start.

Press the Download button and plug in the DC power cord, this will execute a force download.

Figure 6-1. Flash Tool Window

Figure 6-2.Download Port

6.2 Yocto

The Yocto software for Genio 700 (MT8390) EVK is IoT Yocto.

Please note that the enabled board hardware and supported features of IoT Yocto is different from Android.

For an overview, please refer to: <https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/>

Please note that then entire eMMC (except for data stored in eMMC RPMB) will be erased if you flash the board with IoT Yocto images.

6.2.1 Yocto Software Project and Configuration

The build environment for IoT Yocto, and Yocto projects in general, is different from Android. To build the Genio 700 (MT8390) EVK with IoT Yocto, you need to set up the Yocto build environment first

<https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/master/sw/yocto/get-started/env-setup.html>

After the build environment is ready, set the bitbake MACHINE configuration to `genio-700-evk`. Please visit the website for details:

<https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/master/sw/yocto/get-started/build-code.html#build-images-for-genio-evk-boards>

6.2.2 How to Get a Yocto Software Image

To download the latest prebuilt board images, please visit:

<https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/sw/yocto/download.html#prebuilt-board-images>

6.2.3 Yocto Software Image Flash Method

IoT Yocto images use a different tool to flash board images. Please visit the following link to install the flash tool for IoT Yocto on your computer:

<https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/master/sw/yocto/get-started/env-setup.html>

After the flash tool has been installed, visit this page to flash the downloaded prebuilt image package

<https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/master/sw/yocto/get-started/flash.html>

6.3 How to Install Difference Software into Genio 700 (MT8390) EVK

Please note that the storage partition layout of Android and Yocto are different, and the boot flow is also different.

6.3.1 To Flash IoT Yocto

When flashing IoT Yocto images by referring to the below GitLab link, **the eMMC storage (except for data stored in eMMC RPMB) will be erased**, as the IoT Yocto flash tool always formats the storage partitions, making the steps the same regardless of the existing image on the board's storage.

<https://mediatek.gitlab.io/aiot/doc/aiot-dev-guide/master/sw/yocto/get-started/flash/flash-g700-evk.html>

6.3.2 To Flash Android

To flash Android images to a board with IoT Yocto images already flashed, you'll need to:

- A. Configure the "Format" option as "Format whole flash":

Welcome | **Format** | Download | Readback | Memory Test

☐ Validation

☒ **Auto Format Flash**
☐ Manual Format Flash

Auto Format Flag

☒ **Format whole flash** ←
☐ Format whole flash except Bootloader

- B. Select "Format All + Download" option before flashing the Android image:

Welcome | Format | **Download** | Readback | Memory Test

Download Agent | Stop

Download-Agent: [Progress Bar]

Scatter-loading File: [Progress Bar]

Authentication File: [Text Field]

Format All + Download ▾
Format All + Download ←
 Firmware Upgrade
 Download Only

Begin Address: 0x0000000000000000 | End Address: 0x0000000000000000

- C. You need to manually set the board into "Download Mode" by keeping pressing the "Download" button on the EVK while resetting the board.

7 Appendix

7.1 Troubleshooting on Camera Application Icon Disappearance

If we lack the installation of the camera sensor on the EVK while booting for the first time on the Android OS, the camera application icon will disappear, and you can follow the below recovery steps to fix it.

Step:

1. Power off the Genio 700 (MT8390) EVK
2. Install the camera board in the Camera CSI0 connector or the Camera CSI1 connector, then power on the Genio 700 EVK
3. Execute Factory reset :
Settings -> System -> Reset options -> Erase all data (factory reset) -> ERASE ALL DATA -> ERASE ALL DATA
4. Genio 700 (MT8390) EVK will auto-power on
5. Check the camera function

Figure 7-1. Factory reset.

- Description
MT8390A MMD update for modifying the PDN specification

- Affect

Genio 700 (MT8390) EVK need to modify schematic to follow MT8390A_MMD-V0_2

1. Remove C135 and C141 from DVDD_CORE

5. Add a 0.1uF, 6.3V C0201 capacitor on DVDD_GPU

6. Remove C30 from VIO18_PMU_AVDD

7. Add (NEAR DRAM U300)

- 2pcs 1uF/6.3V C0201 on AVDD1_EMI
- 2pcs 1uF/6.3V C0201 on AVDD2_EMI
- 2pcs 1uF/6.3V C0201 on AVDDQ_EMI

8. Add (NEAR DRAM U350)

- 2pcs 1uF/6.3V C0201 on AVDD1_EMI
- 2pcs 1uF/6.3V C0201 on AVDD2_EMI
- 2pcs 1uF/6.3V C0201 on AVDDQ_EMI

8.3 Genio 700 (MT8390) EVK SPI NOR Flash

- Description

MT8390 EVK Schematic for Flash_SI of SPI NOR Flash

- PCB Version

IoT-Genio 700-EVK-P1V3

- Affect

The Genio 700 (MT8390) EVK SPI NOR Flash function is abnormal

- Workaround

- Before: FLASH_SI connects to P33 of MT8390 SoC

- After connecting to FLASH_SI on P30 of the MT8390 SoC

Exhibit 1 Terms and Conditions

Your access to and use of this document and the information contained herein (collectively this “Document”) is subject to your (including the corporation or other legal entity you represent, collectively “You”) acceptance of the terms and conditions set forth below (“T&C”). By using, accessing or downloading this Document, You are accepting the T&C and agree to be bound by the T&C. If You don’t agree to the T&C, You may not use this Document and shall immediately destroy any copy thereof.

This Document contains information that is confidential and proprietary to MediaTek Inc. and/or its affiliates (collectively “MediaTek”) or its licensors and is provided solely for Your internal use with MediaTek’s chipset(s) described in this Document and shall not be used for any other purposes (including but not limited to identifying or providing evidence to support any potential patent infringement claim against MediaTek or any of MediaTek’s suppliers and/or direct or indirect customers). Unauthorized use or disclosure of the information contained herein is prohibited. You agree to indemnify MediaTek for any loss or damages suffered by MediaTek for Your unauthorized use or disclosure of this Document, in whole or in part.

MediaTek and its licensors retain titles and all ownership rights in and to this Document and no license (express or implied, by estoppels or otherwise) to any intellectual propriety rights is granted hereunder. This Document is subject to change without further notification. MediaTek does not assume any responsibility arising out of or in connection with any use of, or reliance on, this Document, and specifically disclaims any and all liability, including, without limitation, consequential or incidental damages.

THIS DOCUMENT AND ANY OTHER MATERIALS OR TECHNICAL SUPPORT PROVIDED BY MEDIATEK IN CONNECTION WITH THIS DOCUMENT, IF ANY, ARE PROVIDED “AS IS” WITHOUT WARRANTY OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE.
