

Magnet Nut

SKU:A184

Description

Magnet Nut is a magnetic nut kit designed specifically for the M5Stack Unit series. It fits the LEGO-compatible holes reserved on Unit modules. With strong magnetic attraction, it easily enables quick module fastening and flexible adjustment of module placement, enabling diverse mounting solutions and improving the convenience of hardware assembly.

Note

Assembly Notes

The brass nut and base of this kit are bonded with adhesive. When assembling with the matching screws, **do not overtighten**, as excessive torque can cause the brass nut to come loose.

Features

- Fits the LEGO-compatible holes reserved on Unit modules
- Magnetic structure for secure connection
- Metal body, sturdy and durable

Includes

- 10 x Magnet Nut
- 1 x Hex Key L-Shape 2.0mm (For M2.5 Screw)

Applications

- Quick magnetic attachment and fastening for Unit modules
- Creative DIY projects with versatile structural assembly
