Description

Adafruit Quad Side-By-Side FeatherWing Kit with Headers is a prototyping add-on and more for all Feather boards. This kit is similar to the FeatherWing Proto except there are four headers. Connect the Feather to three other Feather Wings without needing any stacking headers. The boards are all set up in a 2 x 2 grid. The Quad comes with 1 quad 2 x 2 wing PCB, and 4 sets of Feather Female Headers. The Quad, like the Proto, has three breakouts for each pin on a Feather, and a bunch of plain grid proto holes. Also, the four sets of pins are cross connected and for GND and 3.3V, there's a full strip of connected pads. Female headers will need to be soldered on to the PCB.

Features

- 1 Quad Side-by-side Wing PCB
- 4 sets Feather Female Headers
