### Description

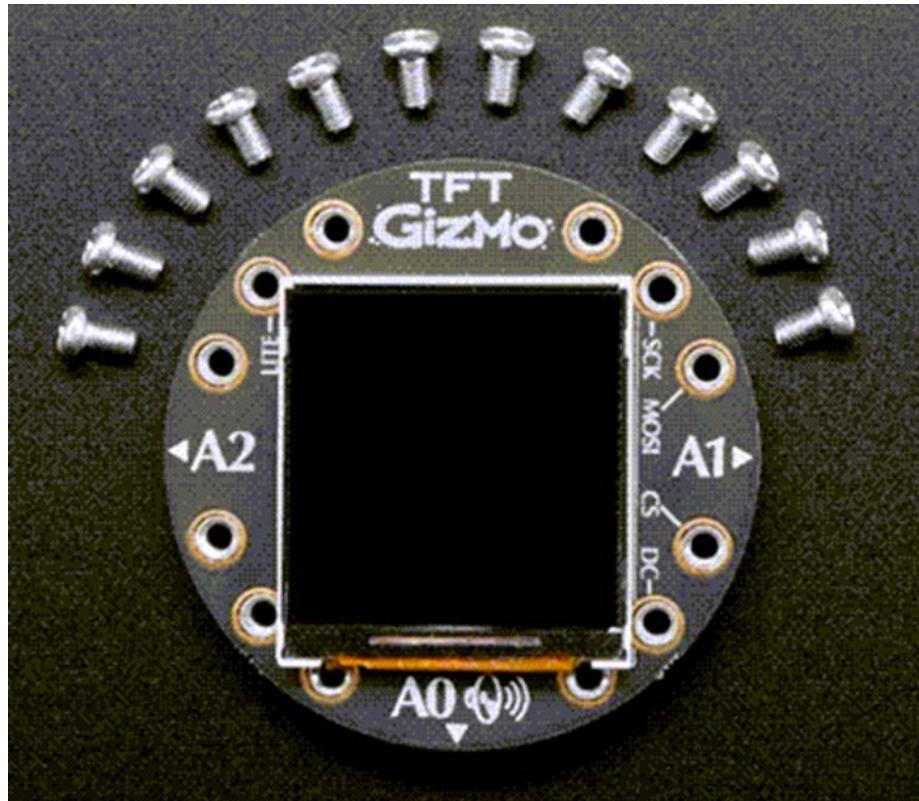

Adafruit Circuit Playground Bolt-on TFT Gizmo is designed to improve Circuit Playground projects by allowing the addition of color display in a reliable fashion. This TFT gizmo features a 1.54" 240 x 240 IPS display with backlight control, Class D audio amplifier, and two 3-pin STEMMA connectors. The Circuit Playground TFT gizmo can be used along with Bluefruit boards for effective CircuitPython use. This gizmo comes with a PCB that has pre-soldered standoffs attached and 12x M3 screws for attachment. The Circuit Playground TFT gizmo also consists of 8mm standoffs that allow lipoly battery to be placed in between the Circuit Playground and gizmo. This gizmo is RoHS2 compliant and is available in 53.3mm x 53.3mm x 9.4mm dimensions.

### Features

- Adds color display in a sturdy and reliable fashion
- 1.54" 240 x 240 IPS display with backlight control
- Class D audio amplifier
- Two 3-pin STEMMA connectors
- Great companion for Circuit Playground Express or Bluefruit boards
- Works in Arduino and CircuitPython
- Comes with a PCB that has:
  - Pre-soldered standoffs attached
  - 12x M3 screws for attachment
- 23g product weight
- RoHS2 compliant
- 53.3mm x 53.3mm x 9.4mm dimensions
