

# D-MARK Stepper Motor Driver Module

CS-DMARK-STMD

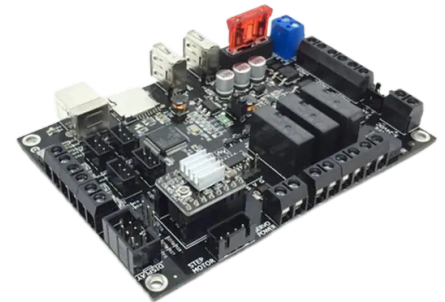

## Product Overview

03/06/2023

For the most up-to-date information, visit [www.mouser.com](http://www.mouser.com) or the supplier's website.

## Description

The Crowd Supply D-MARK Stepper Motor Driver Module slots into the D-MARK Controller Board. This module can drive 4-wire to 8-wire step motors upto 2A. Using the onboard trimpot current limiting can be adjusted. The D-MARK Programmer Clamp is part of the Crowd Supply D-MARK series.

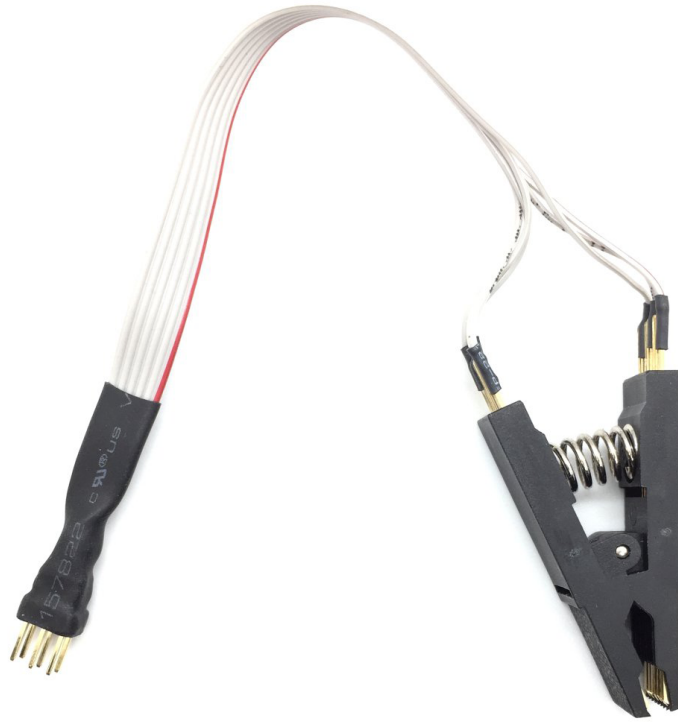

With any AVR programmer, the D-MARK Programmer Clamp can be used that programs the ATTiny84A transparent line driver. This process is carried on only if the custom communications protocol between the STM32F070RB and SenseLog ports is used.

## Features

- Drives 4-wire to 8-wire step motors up to 2A
- Slots into the D-MARK controller board
- Current limiting adjustable

## Programmer Clamp
