

CBD SERIES

PART OF THE COMBO-D FAMILY

MIXED DENSITY D-SUBS FOR POWER, SIGNAL, COAX, HIGH VOLTAGE, AND FIBER OPTIC

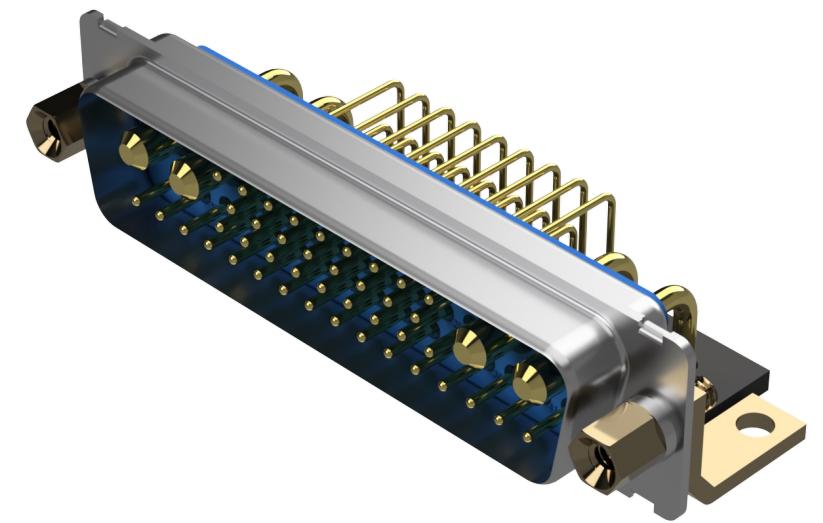

- 30+ mixed contact combinations in six shell sizes
- Variety of standard and specialty contacts available
- Space saving D-shaped connector
- Mil performance level meets applicable performance requirements of DSCC 85039
- Interfacial seals and rear grommets available

APPLICATIONS

- In-flight Entertainment
- Missile Systems
- Medical Imaging Equipment

E-mobility and Robotics products below.*

E-MOBILITY

Positronic is revolutionizing the way we move by developing power, data, and signal solutions for electric vehicles. Our high-current, high-voltage, and high-speed connectors are designed to withstand the harsh environments of electric vehicles, including extreme temperatures, vibration, and shock. Our connectors are built to last, ensuring reliable power delivery and data transfer for the life of the vehicle.

ROBOTICS & AUTOMATION

Positronic is revolutionizing the way we move by developing power, data, and signal solutions for electric vehicles. Our high-current, high-voltage, and high-speed connectors are designed to withstand the harsh environments of electric vehicles, including extreme temperatures, vibration, and shock. Our connectors are built to last, ensuring reliable power delivery and data transfer for the life of the vehicle.
