Description

Microchip Technology EVB-LAN9662 Evaluation Board is the evaluation board for the LAN9662 TSN Switch and is intended to be used with the EVB-LAN9662-Carrier board. The EVB-LAN9662 is a CPU board enabling LAN9662 together with SPI Flash, DDR memory, dual RJ45 network connections, and a console interface.

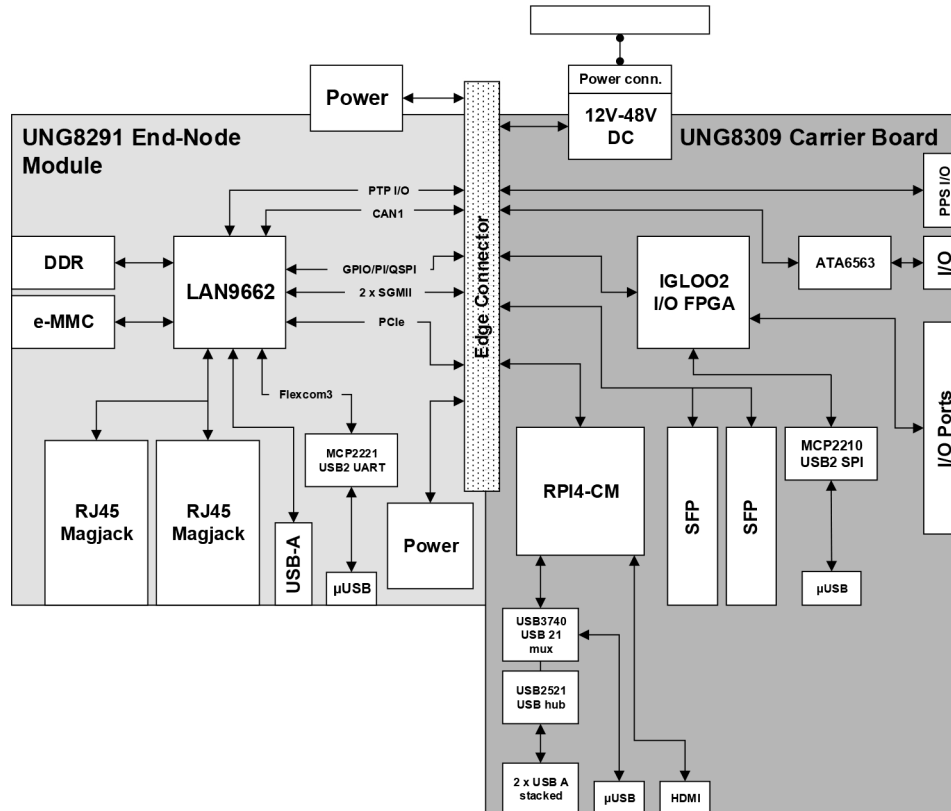

This evaluation board features a LAN9662 AVB/TSN switch, an internal real-time engine, and a 600MHz Arm® Cortex® A7 CPU. The EVB-LAN9662 board offers two tri-speed (10/100/1000M) RJ45 front ports using internal copper PHYs. This board supports a USB 2.0 host port, a micro-USB 2.0 console port, a reset status LED, and per-network port status LEDs. The EVB-LAN9662 board is powered by the micro-USB port, the edge connector, or the expansion header.

Features

- LAN9662 AVB/TSN switch with internal real-time engine and 600MHz Arm® Cortex® A7 CPU
- Two tri-speed (10/100/1000M) RJ45 front ports using internal copper PHYs
- USB 2.0 host port (female type-A connector), DDR memory, dual RJ45 network connections, and a console interface
- Micro-USB 2.0 console port for local management and debugging through a Linux® driver
- Reset status LED and per-network port status LEDs for link and activity indication
- Reset button
- 2x20, 0.1" expansion pin header exposing various interfaces:
 - UART
 - SPI
 - I²C
 - PTP
 - CAN
 - IRQ
- Powered from either the micro-USB port, the Edge connector, or the expansion header
