Description

Seeed Studio Grove Inventor Kit for micro:bit brings endless possibilities to the micro:bit pocket-sized computer. The BBC micro:bit can be used without much electrical and coding knowledge. This kit does not require soldering or jump wires so prototyping is easier and more convenient. This Grove Inventor kit includes the core board, Grove shield for micro:bit, which is compatible with several Grove modules. The Grove Inventor kit also contains eight Grove modules to get started with micro:bit. Twelve projects are available for the kit to use as a step-by-step instruction manual. The necessary libraries (packages) can be downloaded for free.

Features

- Cool extension shield with rich and convenient peripherals
- 10 well-selected Grove modules for working with micro:bit
- 12 awesome projects to get started quickly
