# Electric Imp Breakout

BOB-12886

Product Overview

02-28-2022

For the most up-to-date information, visit www.mouser.com or the supplier's website.

Description

SparkFun BOB-12886 Electric Imp Breakout provides an easy integrated way to connect almost any hardware device both to other devices and internet services. This electric Imp breakout allows exploring the capabilities of the Imp by providing standard 0.1" headers to solder. It also provides the necessary CryptAuthEE IC to identify the prototype to the Imp Cloud service.

To use the mini-USB or battery inputs for power, it must populate the 3-pin jumper and set it to either 'BAT' or 'USB.'
Another way is to power the board using Vin and GND without the use of a jumper.

Features

- Easy integration
- Connects to any hardware, other devices, and internet services
- Explores the capabilities of the Imp by providing standard 0.1" headers to solder
