

Power Management IC Development Tools

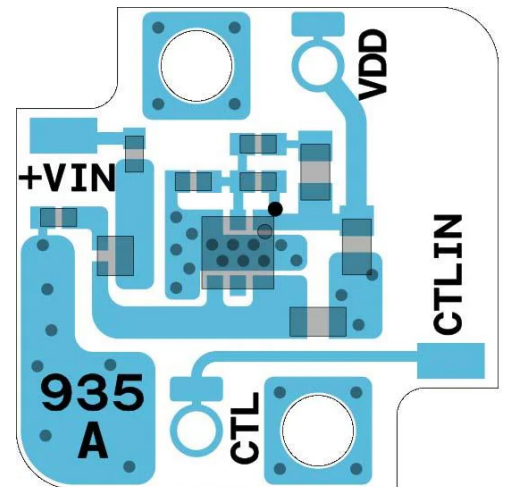

Product Overview

07-02-2026

For the most up-to-date information, visit www.mouser.com or the supplier's website.

X-Microwave Power Management IC Development Tools are used to evaluate DC-DC converters and bias controllers. The XR parts are RoHS-compliant.

The power management IC development tools are used in applications such as CCD bias, LCD bias, GaAs FET bias, and general-purpose negative voltage supplies.

Features

- CCD bias
- LCD bias
- GaAs FET bias
- General-purpose negative voltage supplies

List of Parts

Mouser PNs	Description
433-XM-A766-0404D	Power Management IC Development Tools Bias Controllers, NOPOP
433-XM-A766-0404D-SP	Power Management IC Development Tools Bias Controllers, NOPOP
433-XM-C6L6-0404D	Power Management IC Development Tools DC-DC Converter, LT3462A [PCB: 1156]Fixed Output: -8VDC, 100mAInput: +8 to +10 VDC55% to 75% efficiency
433-XR-A766-0404D	Power Management IC Development Tools Bias Controllers, NOPOP
433-XR-A766-0404D-SP	Power Management IC Development Tools Bias Controllers, NOPOP
433-XR-C6L6-0404D	Power Management IC Development Tools DC-DC Converter, LT3462A [PCB: 1156]Fixed Output: -8VDC, 100mAInput: +8 to +10 VDC55% to 75% efficiency
