

# MyoWare 2.0 Reference Cable

CAB-19244

## Product Overview

10/14/2022

For the most up-to-date information, visit [www.mouser.com](http://www.mouser.com) or the supplier's website.

## Description

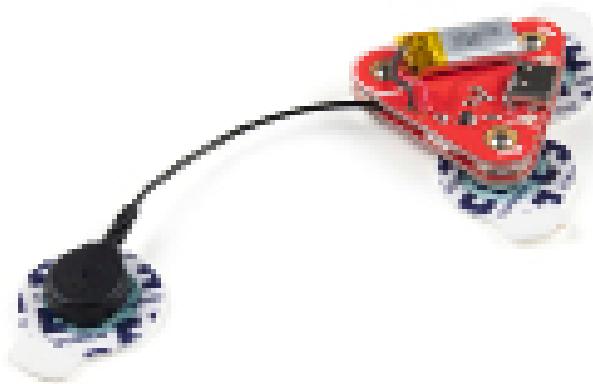

The SparkFun MyoWare 2.0 Reference Cable is an extension for the MyoWare 2.0 Muscle Sensor's reference pin. The pin can be inserted into its housing and placed a biomedical sensor pad into the electrode snap. When ready, stick the reference cable's snap pin to a separate section of the body. The innovative connector system allows users to easily snap shields together with a compact low profile and connect to a microcontroller's analog input to measure the raw, filtered, and rectified electrical activity of a target muscle. This eliminates the need to solder connections between boards.

## Features
