Introduction

The STC-AL Series is based on quad-core Intel Atom® X7-E3950 processors and provides projected capacitive (PCAP) or 5-wire resistive touch interfaces in 10-, 12- and 15-inch display sizes. Support for fieldbus communication, wireless connectivity, and other functions is provided by Mini PCIe expansion, to interface with industrial networks, automated systems, machine controllers, and auxiliary equipment. In addition to default I/O connections, the STC-AL delivers flexible I/O customization to fulfill a wide range of application-specific functionality. The exceptionally robust system features IP65-rated moisture and particulate protection on the front side and operating temperature compatibility up to -20°C to 60°C. Versatile power input capability ranges from 9V to 36V. Remote management of STC provided by ADLINK's SEMA (Smart Embedded Management Agent) utility for maximized system uptime.
