## SNAP LOCK SUPPORTS

Snap lock supports are easily installed by hand. They offer a quick and easy alternative to using screws and nuts to standoff PCB's.

### APPLICATION:

Snap Lock Supports aid the support, spacing, locking and guiding of the printed circuit board within electronic applications. The majority of PCB supports are designed to be installed manually by hand and do not require automated assembly equipment.

### FEATURES:

- Spaces PCB's to an exact height
- Easily installed by hand
- Eliminates the need for screws and nuts
- Provides electrical insulation
- Largest selection in the industry
- Available for multiple hole and panel sizes
- Locking and non-locking versions
- High temperature version for applications up to 392° F
