

DESCRIPTION

The TBMA600 is a test board for the MA600 series TMR magnetic position sensors. The TBMA600 allows users to easily evaluate the MA600 series.

TBMA600 test boards are compatible with the EVKT-MagAlpha-MagDiff communication kit (hardware) and the MagAlpha Evaluation App (software), offering seamless connection and operation of the MA600 series sensors, and allowing users to evaluate the MA600 series with their own set-up.

The TBMA600 test board includes the assembled board with the sensor, decoupling capacitors, resistor, and connectors.

FEATURES

- Evaluation Board Supports Side Shaft and End-of-Shaft Mounting
- Compatible with the MagAlpha Evaluation App (Software) That Is Used with the EVKT-MagAlpha-MagDiff (Hardware)

APPLICATIONS

- Servo Drives
- Robotics
- Automotive
- BLDC Motor Commutation
- Encoders

All MPS parts are lead-free, halogen-free, and adhere to the RoHS directive. For MPS green status, please visit the MPS website under Quality Assurance. "MPS", the MPS logo, and "Simple, Easy Solutions" are trademarks of Monolithic Power Systems, Inc. or its subsidiaries.

MAGNET SUPPLIERS

A selection of magnets are available with the MPS MAG10 magnet product family. This family offers three different magnet geometries: cylinder, ring, and half-cylinder. Figure 7 shows the available magnet geometries. The MPS MAG10 magnet product family can be purchased directly from MPS.

If the magnet required for your application is not listed on our website, consider the following non-exhaustive list of possible magnet suppliers (see Table 4). The magnetization direction must be chosen wisely given that most sold magnets are often axially magnetized, which is not a magnetization direction typically required in magnetic angle-sensing applications. Angle-sensing applications typically use diametrically magnetized magnets.
