Single device installation

Terabee People Counting L-XL installs like a household smoke alarm, it needs to be placed centrally above doors and corridors and 30 cm minimum from the nearest vertical wall.

The monitored floor area depends on installation height:

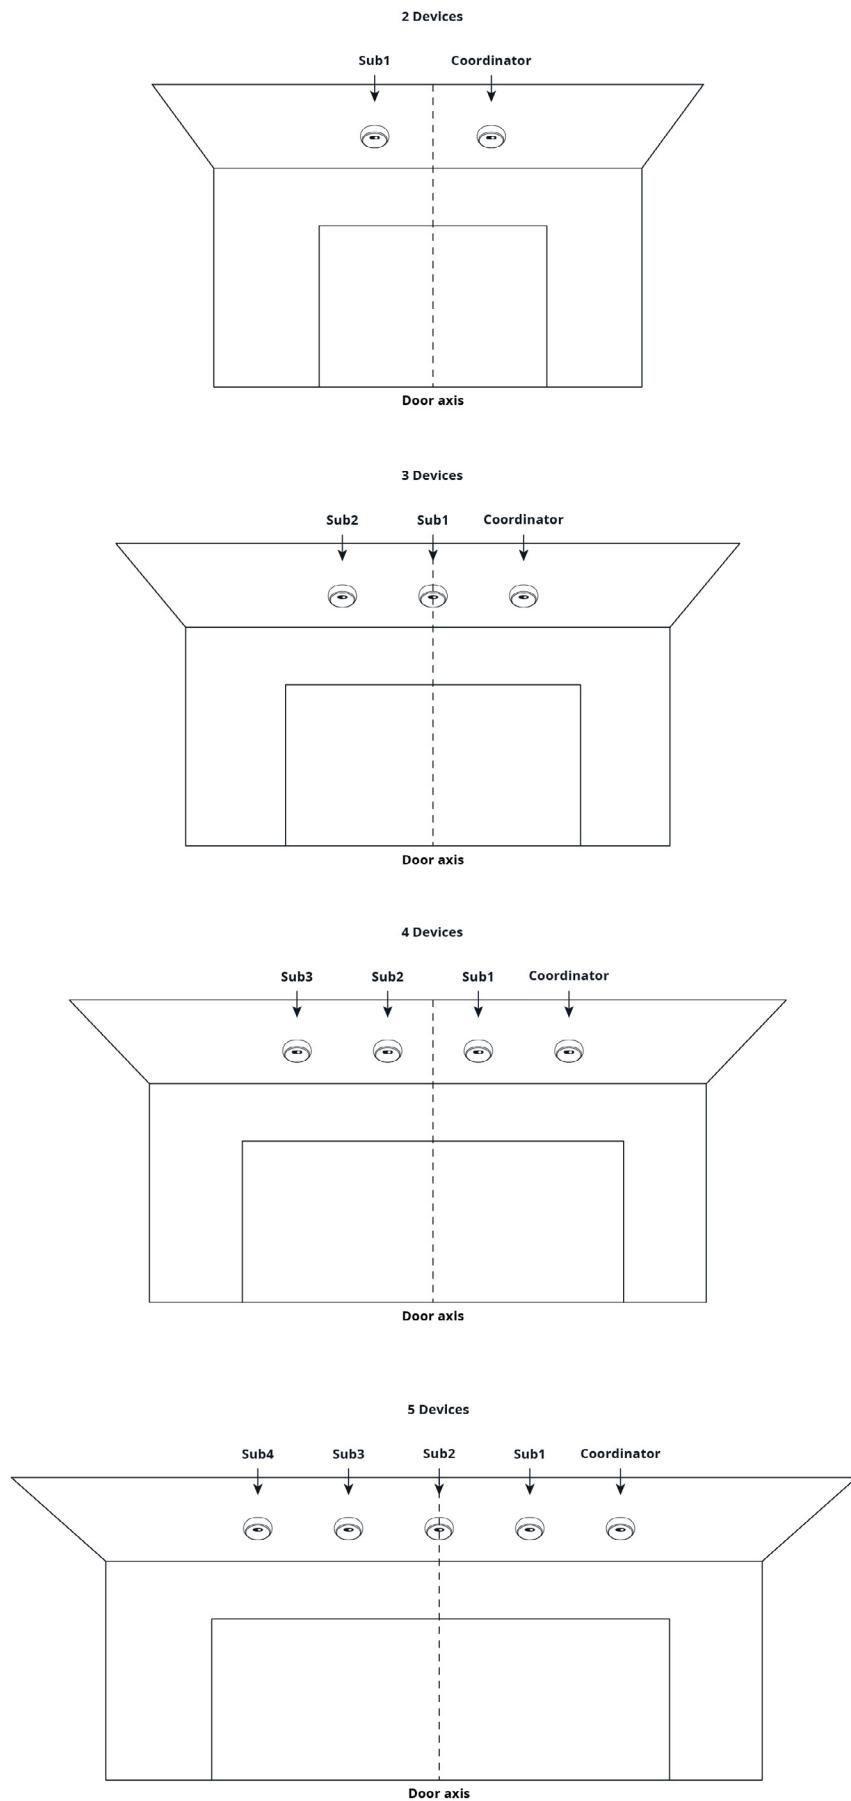

Installation height (m)	Monitored area (m x m)
2.40 (min)	1.50 x 1.10
3.20	2.30 x 1.70
4.00 (max)	3.40 x 2.55

Multi-device installation

Up to five Terabee People Counting L-XL devices can be installed together to cover wider entrances and passageways. One device acts as the coordinator and the others as subordinates.

Time-of-Flight advantages

By using active Time-of-Flight technology to sense depth, the Terabee People Counting L -XL collects non-intrusive depth image data, meaning that personal identity can never be captured. And, since the device does not require ambient light for optimal performance, it is suitable for applications in low light without losing accuracy.
