

# Underwater Multi-Conductor Cables

Our polyurethane jacketed underwater cables are engineered to perform reliably in harsh marine environments. Designed with a flexible, premium-grade polymer insulation with low moisture absorption characteristics and clean-stripping elastomer water block, our Xtreme cables are pressure-resistant and built to withstand demanding underwater conditions. Optional shielding is available with 100% aluminum/mylar coverage or a braided tin copper shield with a minimum of 85% coverage. Optional synthetic fiber (Kevlar, Vectran) or steel (GIPS, SS) strength layers upon request.

## KEY FEATURES

Rugged multiconductor cables are designed for:

- Continuous underwater use in freshwater or seawater

Winchester's Xtreme grade polyurethane jacket:

- Improves abrasion and cut through resistance
- 7km depth rated pressure resistant waterblocked core
- Provides a solid cable for various marine applications
