

**NEW**

SUBMINIATURE SNAP SWITCH

# ZMW SNAPS

## Product Overview

The new ZMW snap-acting switch with long stroke and silent actuation

More information is always searchable on C&K website [www.ckswitches.com](http://www.ckswitches.com)

## Key Product Features

- Long Stroke with silent actuation, suitable for applications requiring reduced audible click when operating.
- Sliding contact design ensuring no pollution of foreign materials into the switch.
- Ideally suited for signal application in automotive.
- IP67, with potted wires. Designed for rugged applications.
- Available in pin plunger, lever and wire harness versions making integration into customer designs easier.
- RoHS compatible and compliant, enables the customer to use on new designs requiring ROHS compliance.
- Direct compatibility with Competitors like Omron and Alps Alpine.

## Applications

- Automotive – door or latch detection
- Industrial – oil and chemical industries in pumps
- Home appliances – propane stoves, HVAC, washing machines

## What are your initial requirements?

- Is space a constraint in your application?
- Do you need extra low current/ signaling application?
- Type of Actuator required?
- Type of Termination required?
