ESD Protection Requirements

Integrated circuits usually have ESD ratings per the JEDEC (Joint Electron Device Engineering Council) JESD22-A114 standard. This standard was developed to provide a method for evaluating the ESD sensitivity of devices in the manufacturing environment. The test circuit discharges a 100 pF capacitor through a 1500 ohm resistor. In contrast, the more stringent IEC 61000-4-2 Standard is used to evaluate the sensitivity of a system to an ESD event. The test circuit, which is shown to the right, discharges a 150 pF capacitor through a 330 ohm resistor. The table below lists the peak currents and voltages for levels 1-4. In addition to these four levels, the standard allows a user defined level. A sketch of a typical ESD current waveform, per IEC 61000-4-2, is also shown. Note that the current amplitude after 30 seconds and 60 seconds is about 54 % and 25 % of the initial peak, respectively.

IEC 61000-4-2 Level	Contact Voltage (kV)	Air Discharge Voltage (kV)	Peak Contact Current (A)
Level 1	2	2	7.5
Level 2	4	4	15
Level 3	6	8	22.5
Level 4	8	15	30

Bourns manufactures a wide range of components that provide system level ESD protection. From our ChipGuard® devices through our TVS diode arrays, Bourns has the right products to help your product meet its system level ESD requirements.

The following pages of this ESD brochure contain a selection flowchart, application examples and device selection tables that show key parameters of our devices. For additional assistance please contact your local Bourns field applications engineer or sales office. You can also visit our website at www.bourns.com. In the circuit protection category under products, you will find links to our ChipGuard® ESD Suppressors, TVS diode and TVS diode array devices.

Device Selection Flowchart

Notes:

- (1) Provides Level 1 protection. All other devices are Level 4.
- (2) Includes EMI Filter.
- (3) Surge rated devices with 8/20 μ s current surge rating ≤ 5 A, per IEC 61000-4-5.
- (4) Surge rated devices with 8/20 μ s current surge rating ≥ 5 A, per IEC 61000-4-5, except the CGA0603MLA-16150E/17300E/3210E which are rated ≤ 5 A.
