

# Ethernet Solutions

## for BROADCOM - Mass Market PHYs

### Product Selection Guide

The Stewart Connector and Bel Magnetic Solutions brands encompass a comprehensive portfolio of connector and magnetic options that combine Bel's connector and magnetic design expertise to provide the highest level of connectivity and signal conditioning.

## Connector Options

- Multi-port configurations: 1x2 / 1x4
- Stacked configurations: 2x1 / 2x4 / 2x6 / 2x8
- With or without LED's
- Vertical mount packaging
- Enhanced shielding panel grounds

## Magnetic Options

- 10/100 AutoM 4-5-18 DIX
- 10/100/1000 Gigabit
- Power over Ethernet (PoE) options
- Extended temperature range of -40°C to +85°C
- 1, 2, and 4 port solutions

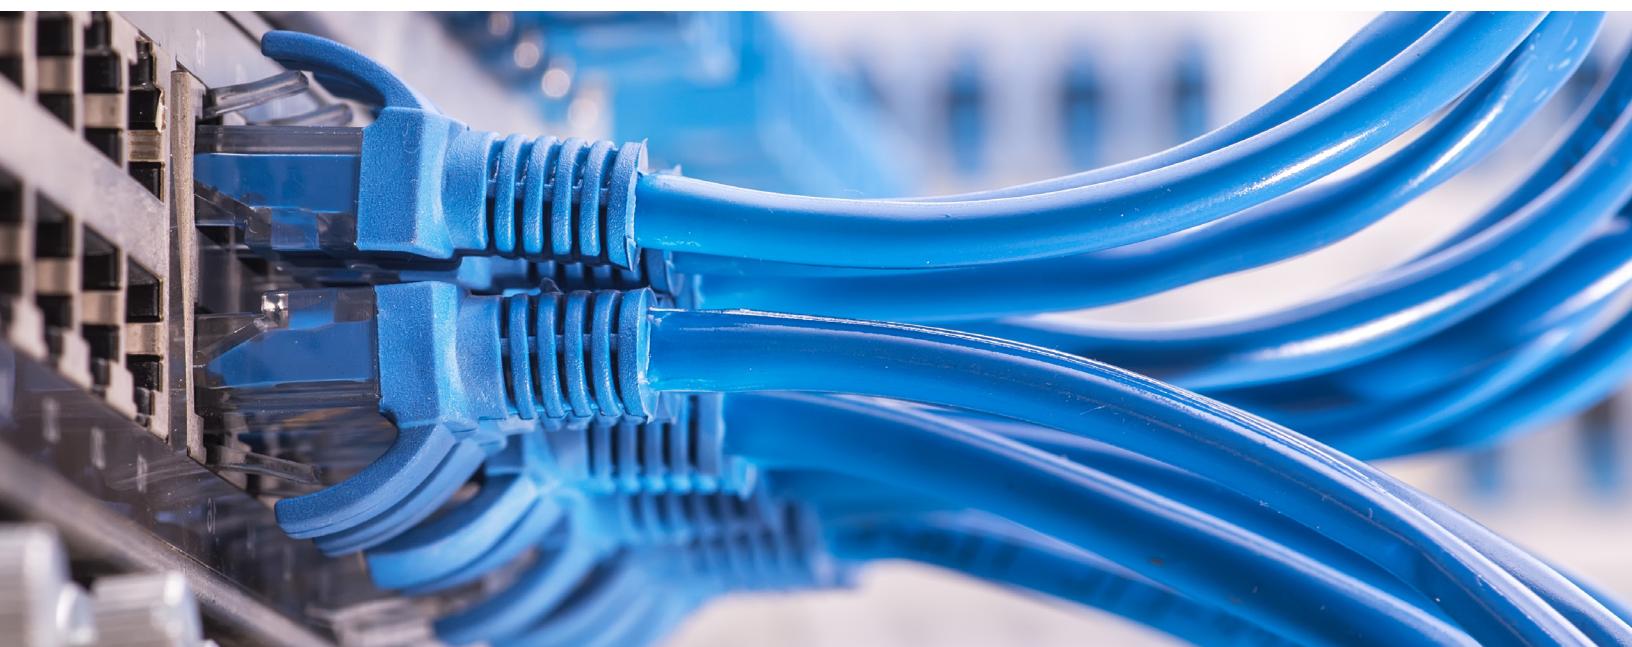

## Bel Magnetic Solutions

Discrete LAN Magnetics product line consists of a broad range of magnetic-based solutions designed for use in high-speed computer and networking applications. Bel's portfolio of single, dual and quad SMT modules are compatible with IEEE 802.3 Ethernet standards for 10/100, 1G, 2.5G, 5G and 10GBaseT transmission. Product development will continue to focus on devices compatible with the bandwidth required to support the convergence of voice/video/ data networking, high-performance computing, and storage traffic within the enterprise space and data centers.

## Stewart Connector

Stewart Connector portfolio of products include one of the broadest ranges of Ethernet connectivity available in the market today. Our interconnect product line includes passive jacks, plugs, and cable assemblies that provide connectivity in networking equipment. All of our connector products are designed to meet industry standard performance requirements and are capable of delivering data speeds through 10GBaseT Ethernet. In addition, our products are designed to exceed the requirements for all existing PoE standards including: PoE, PoE+, and 100W PoE.

## 10/100 PHYs

## About Bel

Founded in 1949, Bel designs, manufactures and markets a broad array of products that power, protect and connect electronic circuits.

With over 65 years in the electronics industry, Bel has reliably demonstrated the ability to succeed in a variety of product areas across multiple industries. The company has a strong track record of technical innovation working with the engineering teams of market leaders.

Bel has consistently proven to be a valuable supplier to the foremost companies in its chosen industries by developing cost effective solutions for the challenges of new product development. By combining our strength in product design with our own specially designed manufacturing facilities, Bel has established itself as a formidable competitor on a global basis.
