

# 60 YEARS OF AMERICAN INGENUITY AND GERMAN ENGINEERING

## Still the World's Best Keyboards

Over a half century ago, American innovator Walter Cherry turned to German engineering to design and develop the best keyswitch technology in the world. Now five decades later, CHERRY has been making keyboards nearly longer than any other company, and is considered by many to build the best keyboards in the world. In fact, CHERRY MX is still widely considered to be the gold standard precision technology for mechanical keyswitches. Our renowned technology innovation and attention to detail carries through CHERRY's entire product portfolio, and our rugged, reliable performance products continue to win awards today.

### CHERRY MX BOARD AWARDS

"The MX Board is a fast and comfortable typing device, especially useful for heavy users. The keyboard might be specifically marketed towards gamers, but don't let this fool you. It does wonders in an office environment as well."

"The classic keyboard layout is one of the best. It's one of the best models on the market, and it is great in the office or for gaming."

"Materials and finish are truly remarkable, and everything is solid on an 'ultimate' level; the CHERRY MX switches with the latest technology, the design of the board and the palm rest (ergonomics) make this a fantastic keyboard to work with."
