

## Conformal Coating Masking Material Questions

1. Who is your current supplier?
2. What material are you using currently?
3. What is your current application method for masking?
4. How are you cleaning prior to coating (water, saponifier, solvent?)
5. What is your current conformal coating(s)?
6. What is your cure Method for conformal coating (UV/Moisture - UV/Heat - Heat - RTV, 2 part):
7. What is the processing temperature of conformal coating process?
8. What areas/parts are being masked?
9. What is the complexity of masking areas?
10. What is the throughput of the coating process?
