

F1A1-303012 F1A1-303015 F1A1-303018

Shielded SMT Power Inductors

Signal Transformer is introducing the beginning of a new family of low-profile shielded surface mount power inductors with the release of the first of three series, F1A1-303012/303015/303018. Height profiles of 1.2 mm to 1.8 mm, small footprints of 3.0 mm x 3.0 mm and broad range of inductance and current ratings, make them ideal for a wide range of applications.

Power inductors are an essential component in the voltage regulator topology. Virtually every circuit that regulates power in automobiles, electronics and DC-DC converters requires an inductor.

Magnetically shielded inductors minimize EMI while balancing small size with low DCR and high current ratings. Perfect as power chokes and for eliminating noise in power supplies in automotive, commercial, industrial, and high-reliability designs.

They are primarily used in electrical power and electronic devices for these major purposes: Choking, blocking, attenuating, or filtering/smoothing high frequency noise in electrical circuits. Storing and transferring energy in power converters (DC-DC or AC-DC) or inverters (DC-AC).

General Features

- Surface Mount
- Low profile & compact size
- Magnetically shielded construction
 - Low radiation
- High saturation & high heating current
- Copper base with DR core & RI core
- Automated process

Specifications

- Inductance Range: 1.2 μ H to 47 μ H
- Saturated Rated Current: 0.25 A to 1.1 A
- Temperature Rise Current: 0.23 A to 1.1 A
- Operating Temperature Range: -40°C to +105°C (Including coil self-temperature rise)
- Storage Temperature Range (component): -40°C to +125°C

Applications

- DC-DC converters in consumer, industrial & telecom electronics
- Wearable devices
- HDDs, SSDs
- Smartphones
- Digital equipment
- Laptops, digital cameras
- Filtering of supply voltages

F1A1-303012/303015/303018 Series Datasheet

PRODUCT IDENTIFICATION

F1A1 - 303012 - 100 M - TR

Type / Product Series

F1A1 = Shielded SMT Power Inductors

Dimensions

303012 = 3.0 x 3.0 x 1.2 mm

303015 = 3.0 x 3.0 x 1.5 mm

303018 = 3.0 x 3.0 x 1.8 mm

Inductance *

100 = 10 μ H

* Note: Expressed by three figures. The unit is micro henry (μ H). The first and second figures are significant digits, the third figure expresses the number of zeros which follow the two figures.

If there is a decimal point, it is expressed by the capital letter "R" (3R8 = 3.8 μ H). In that case, all figures are significant digits.

Packaging

TR = Tape & Reel

No code = Bulk

Inductance Tolerance

M = $\pm 20\%$

N = $\pm 30\%$

MECHANICAL SPECIFICATIONS

Dimensions are in mm.

SERIES	A	B	C Max	D	E	F	G	H	L
F1A1-303012	3.0 $\pm$ 0.2	1.0	1.2	2.0	0.5	0.5	1.8	1.2	4.0
F1A1-303015	3.0 $\pm$ 0.2	1.0	1.5	2.0	0.5	0.5	1.8	1.2	4.0
F1A1-303018	3.0 $\pm$ 0.2	1.0	1.8	2.0	0.5	0.5	1.8	1.2	4.0

- Co-planarity: 0.15 Max
- Undeclared tolerance:
X.X $\pm$ 0.25 unless stated otherwise
X.XX $\pm$ 0.15 unless stated otherwise

F1A1-303012-6R8N	6.8	30	100	520 (400)	0.43	0.30	0.62
F1A1-303012-8R2N	8.2	30	100	560 (430)	0.38	0.28	0.58
F1A1-303012-100M	10.0	20	100	780 (600)	0.33	0.25	0.55

¹ I_{SAT} (Saturation Rated Current): The current when the inductance becomes 30% lower than its initial value (Ta = 25°C and Ta = 100°C).

² I_{RMS} (Temperature Rise Current): The current when the temperature of coil increases up to max. $\Delta T = 40^\circ\text{C}$ (Ta = 25°C).

• Test equipment

L: measured on Agilent 4284A LCR meter or equivalent

DCR: measured on Chroma 16502 micro-ohm meter or equivalent

I_{SAT} & I_{RMS}: measured on Agilent 4284A LCR meter with 42841A Current source or equivalent

TYPICAL PERFORMANCE CURVES

Inductance vs DC current

Temperature rise vs DC current

RECOMMENDED REFLOW SOLDERING CONDITIONS (SMT-TYP)

- **ADD**

The recommended reflow conditions as above graph, is set according to our soldering equipment.

Since various manufactures may have different reflow soldering equipment, products, process conditions, set methods, etc., when setting the reflow conditions, please adjust and confirm according to users' environment/equipment.

- **Notice**

- Solder reflow temperature: $+250^{\circ}\text{C}$ max. for maximum 10 seconds
- It is not recommended to solder inductors by soldering iron
- Please contact us for details

Custom versions available upon request.

About Signal Transformer

Signal Transformer is known as the world's leader of wire wound magnetic solutions since 1959. With over 50 years of experience manufacturing transformers, chokes, inductors and custom or modified standard products. Signal offers not only the most comprehensive line of certified standard power conversion products, with our vast engineering, manufacturing and regulatory resources; Signal Transformer excels in the design and manufacturer of cost effective, specialized platforms.
