

Inductors for power circuits

Thin-film metal magnetic material

TFM-BLF series

## TFM201208BLF type

### FEATURES

- By using metal magnetic material with high Saturation magnetic flux density the excellent DC bias characteristics needed for inductors for power circuits can be achieved.
- With the same product shape and terminal structure as general chip parts it has excellent mounting stability characteristics and can also be mounted to general-purpose land patterns.
- By using a closed magnetic circuit structure leakage flux is minimized.

### APPLICATION

- Smart phones, smart watch, tablet terminals, HDD, SSD, mobile display panels, portable game devices, compact power supply modules, TWS, AR/VR, other

### PART NUMBER CONSTRUCTION

TFM	201208	BLF	-	1R0	M	T	CA
Series name	LxWxH dimensions 2.0x1.20x0.8 mm	Characteristic type		Inductance (μH)	Inductance tolerance	Packaging style	Internal code

### CHARACTERISTICS SPECIFICATION TABLE

L (μH)	Tolerance	Measuring frequency (MHz)	DC resistance (mΩ)max.	Rated current*				Part No. <a href="#">TFM201208BLF-1R0MTCA</a>
				Isat (A)max.	Isat (A)typ.	Itemp (A)max.	Itemp (A)typ.	
1.0	±20%	1	55	50	3.4	3.7	2.7	2.9

\* Rated current: smaller value of either Isat or Itemp.

Isat: When based on the inductance change rate (30% decrease from the lower limit of the L standard)

Itemp: When based on the temperature increase (temperature increase of 40°C by self heating)

#### Measurement equipment

Measurement item	Product No. *	Manufacturer
L	4294A	Keysight Technologies
DC resistance	AX-114N	ADEX
Rated current Isat	4285A+42841A+42842C	Keysight Technologies

\* Equivalent measurement equipment may be used.

### TEMPERATURE RANGE, INDIVIDUAL WEIGHT

Operating temperature range *	Storage temperature range **	Individual weight
-40 to +125 °C	-40 to +125 °C	0.011 g

\* Operating temperature range includes self-heating.

\*\* The storage temperature range is for after the assembly.

## REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

### SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products

### REMINDERS

- The storage period is within 6 months. Be sure to follow the storage conditions (temperature: 5 to 40°C, humidity: 20 to 75% RH or less).  
If the storage period elapses, the soldering of the terminal electrodes may deteriorate.
- Do not use or store in locations where there are conditions such as gas corrosion (salt, acid, alkali, etc.).
- Soldering corrections after mounting should be within the range of the conditions determined in the specifications.  
If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.
- When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.
- Self heating (temperature increase) occurs when the power is turned ON, so the tolerance should be sufficient for the set thermal design.
- Carefully lay out the coil for the circuit board design of the non-magnetic shield type.  
A malfunction may occur due to magnetic interference.
- Use a wrist band to discharge static electricity in your body through the grounding wire.
- Do not expose the products to magnets or magnetic fields.
- Do not use for a purpose outside of the contents regulated in the delivery specifications.
- The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition.  
The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property.  
If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.
