# Automotive Product Solutions

**Connect - Enabling Intuitive Interaction and Seamless Communication**

LITEON offers complete automotive LED portfolios in the industry—covering visible and sensing applications from components to advanced light engines such as ADB and flexible mini-LED modules.

All products meet AEC-Q standards and are manufactured in IATF-16949 certified facilities, ensuring reliability and quality.

Our flexibility allows us to adapt designs for specific OEM needs and deliver full automotive-grade certification.

## Automotive Lighting Solution

- Full Range Coverage  
From DRL, Headlamps, Rear lamps, Smart light and Mini LED solution
- Automotive-Grade Compliance
- AEC-Q certified, IATF-16949 facilities
- Flexible Customization
- Tailored designs for OEM requirements

## Typical Design-In Entry Points

- Front Lamp: High light efficiency and better thermal management
- Rear Lamp: High stability and durability
- Smart LED: Integrate IC and RGB LED provides dynamic color-changing
- Mini LED: Reduce module size and high-resolution product
