

Illumination Product Solutions

Connect - Enabling Intuitive Interaction and Seamless Communication

LITEON strategically delivers diversified LED solutions across consumer, industrial, and intelligent applications, spanning from core components to advanced light-engine technologies.

All products are developed and manufactured in compliance with ISO 9001, ISO 14001, QC 080000, and OHSAS 18001, with production carried out in IATF-16949 certified facilities to ensure superior quality and reliability

Mini LED Solution

- Comprehensive package solutions, including ultra-compact and ultra-thin devices
- Resistant to burn-in and offers superior durability and longevity

Smart LED Solution

- Enables sensing, communication, and smart system integration
- Supports adaptive dimming and optimized power management

UV LED Solution

- Comprehensive package solutions, including ultra-compact and ultra-thin devices
- Resistant to burn-in and offers superior durability and longevity

CBI LED Solution

- Chip-based integration enables smaller form factors and flexible system design
- Optimized light output and heat dissipation improve reliability and performance
