LITEON®

LED Module Product Solutions

Connect - Enabling Intuitive Interaction and Seamless Communication

LITEON has extensive experience in delivering highly customized module solutions, supported by its mature engineering capabilities and proven manufacturing expertise. Our modules integrate hardware, firmware, and software into a cohesive system, ensuring optimal performance and seamless functionality. We offer full customization of optical patterns, mechanical dimensions, pitch, and color specifications to meet diverse application requirements. With this flexibility and technical depth, LITEON's customized modules can be widely applied across consumer electronics, industrial equipment, and home application markets.

Matrix Module

- Concealed creative visual display with a clean, seamless appearance
- Ultra-thin, fully customizable design enabled by Mini LED and flexible PCB
- Power-efficient architecture using high-efficiency LEDs and custom light patterns with optimized LED layout
- Small pitch and flexible form factor to adapt to diverse installation scenarios

Backlight Module

- Tailored Mechanical Solutions for Optimized Integration
- Fully Customizable Structural Design
- Seamless RGB Gradient Effects
- High-Precision Light Control

Light Strip / Fiber

- Flexible Design Options: Standard or Custom Length, Cuttable Units
- Concise / High impact, Dynamic & Vibrant Lighting
- Premium / Customer facing, Highly Flexible Design Featuring Standard or Custom Lengths with Cuttable Units
