

MICRO-D

Ruggedized Miniature Backshell Systems

The NorComp MICRO-D backshell optimizes the conventional D-Sub backshell into a compact configuration, perfect for space-restricted applications like industrial robotics, commercial military (COTS) equivalents, wireless transmitters and receivers. This design efficiently manages space while ensuring robust performance in demanding environments.

FEATURES & BENEFITS

- Die cast ZAMAK backshells
- Designed for the NorComp 580-M series
- Available in 3 industry standard sizes | 9, 15, 25
- Compatible with most industry micro D-Subs
- 1/3 the size of a standard backshell
- Metal to metal interface for robust mechanical connections & shield effectiveness
- -30°C TO +80°C (with grommets)
- -40°C TO +125°C (without grommets)
