

Durable solutions for your solar and PV applications

The requirements for our broad product range in professional cable management are very high. It must be reliable, material resistant and durable.

To meet this, we have developed our components and systems to be corrosion, UV and temperature resistant. Adapted to different applications and loads, our products are furthermore vibration, impact and tear-out resistant. In addition, they are highly dense and easy to assemble.

Our flexible cable protection solutions for the PV modules

- ✓ Subsequent assembly
- ✓ Wide temperature range
- ✓ Self-extinguishing
- ✓ UV resistant

EW-R-PP

The EW-R-PP cable protection conduits are made of specially modified and elaborately processed recycled polypropylene. EW-R-PP cable protection conduits are characterized by excellent chemical resistance and good impact resistance.

EWT-PP

The EWT-PP cable protection conduits are made of specially modified polypropylene. The material is phosphor and cadmium-free. For static applications involving light to medium mechanical loads.

EW-PP

The self-extinguishing EW-PP cable protection conduits are made of specially modified polypropylene. EW-PP cable protection conduits are characterized by excellent chemical resistance and good impact resistance. The EW-PP is also suitable for static and dynamic applications with medium to high mechanical loads.

Our smart components for control cabinets

- ✓ Subsequent assembly
- ✓ Wide temperature range
- ✓ Self-extinguishing
- ✓ UV resistant

mp-LM 3

Economical laser labeling system for the automated processes of individual print jobs for the project-specific labeling of most murrplastik plastic labels. Individual murrplastik labeling and fitting service. Simply send your labeling data to our service center by e-mail and we'll get started for you.

KSM

KDP/Z – KDP/ZR

Our plastic cable entry plate KDP/Z impresses with enormous time saving during assembly and a high packing density. The KDP/Z is particularly suitable for the fast and smooth routing of cables. Whether round or rectangular: our KDP/Z series offers a wide range of possibilities.

ZL-fix

The strain relief ZL-fix may be used wherever cables, wires, single wires or conduits must be strain relieved or routed in a way that is secure, easy and cost-effective. The strain relief ZL-fix is available in two versions, either for direct screw fastening (flathead screw M5, not included in delivery) or for fastening on a profile with 10 mm groove width (integrated nut strap).
