

Potting Application Questions

1. What type of component are you potting (plastic, metal, rubber?)
2. What is the size of the PCB/ component that you are potting?
3. What is the type and size of the housing?
4. What is the minimum and maximum temperature of your application?
5. Are you looking for a soft or hard material?
6. Are you looking for clear, opaque or black material?
7. Are there any specific solvents or environments that the potting must withstand?
8. How will you cure the material? (room temperature, heat, UV?)
9. Is UL required?
10. What is the required pot life?
11. Are you looking for thermally conductive potting material?
12. What is the end/final product?
13. What is your estimated monthly/ yearly volume? (How much potting material will you be using per month?)
