

Stepping Systems Success Story

Industry : Medical equipment

Application : Bacteria detection system

Product : 2-phase stepping motor SANMOTION F2 42 mm
SS2421-5041 1A/phase compact type
With customized mounting holes and lead wires
Quantity: 100 pcs/year (1 axis/machine)

Use : Conveyor axis

Issue, Request : Size reduction of product and less man-hour spent on the product.

Solution : We recommended customer to use compact type stepping motor with customized mounting holes and lead wires that were done by customer before.

Merits : Size of product is reduced using compact type stepping motor.
Total man-hour spent by customer is reduced as mounting hole and lead wire customization is done by SANYO DENKI.
