

Stepping Systems Success Story

Industry : Food processing equipment

Application : Waterjet cutting machine for pastries
Water is injected from very small nozzles to cut objects such as frozen pastries into all kinds of shapes.

Product : SANMOTION F2 Stepping Motor
Customized 86 mm sq. motor

Quantity : 100 equipment/year (2 axes/equipment)

Use : Orthogonal axes (X,Y)

Request : Better quality and lower cost

Solution : We provided customer with the optimal motor and customization that fits their equipment requirements.

Merits : Our flexible product customization satisfies requirements of customer's equipment. As the product processing is now done by SANYO DENKI, customer is able to reduce number of components they keep and manage and reduce man hour spent on product processing.
