CONTENTS

ABOUT STANDEX

Customer Focused Engineering Solutions. "Innovating for more than 50 years."

The Standex Electronics business, a division of Standex International Corporation (NYSE:SXI), has been providing solutions through high-performing products since the 1950's. Through growth, acquisition, strategically partnering with customers, and applying the latest engineering designs to the needs of our ever-changing world, Standex Electronics technology has been providing quality results to the end-user. The approach is achieved by partnering with customers to design and deliver individual solutions and products that truly address customers' needs.

Standex Electronics is headquartered in Cincinnati, Ohio, USA, Standex Electronics has nine manufacturing facilities in six countries, located in the United States, Germany, China, Mexico, the United Kingdom, and Japan.

That's **Standex** | Smart.

standexelectronics.com

WHO WE ARE / WHERE WE PLAY

Powerfully transforming. "When failure is not an option, designers of critical electronic components rely on Standex and their decades of experience."

Standex Electronics is a worldwide market leader in the design, development and manufacture of custom magnetics and power conversion components and assemblies. Our work, growth, and dedication to providing reliable high-quality products through our engineering and manufacturing expertise go beyond products we ship.

We offer engineered product solutions for a broad spectrum of product applications in all major markets, including but not limited to:

- Aerospace & Military
- Alternative Energy
- Automotive (EV) & Transportation
- Electric Power & Utilities
- Medical
- Smart Grid & Metering
- Industrial & Power Distribution
- Test & Measurement
- Security & Safety
- Household & Appliances

Our values and what we believe align to the partner, solve, and deliver® approach. We produce parts but we are more than that. Connecting with your team as a strategic partner, listening to your challenges, and arriving at ways to solve your complex problems through our solutions are why we exist. We have custom capabilities that address your needs. Our team leverages our dynamic and diverse engineering expertise and other resources such as our global facilities for logistics and production.

50 YEARS of INNOVATION

Seit über 50 Jahren ist Standex Electronics also innovatives Unternehmen mit neusten Produkten, unterschiedlichsten Kundenprojekten und dem Ausbau unserer globalen Präsenz am Markt vertreten und kann dadurch ein stetiges Wachstum verzeichnen.

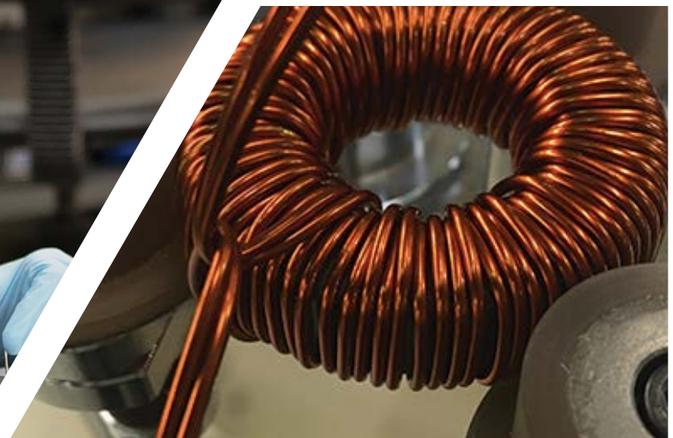
OUR CAPABILITIES



MANUFACTURING

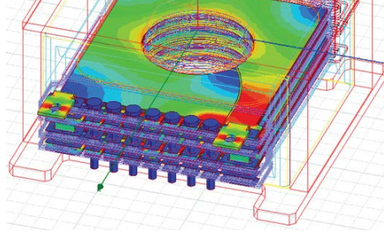
52 to 5awg Magnetic Wire Winding
Foil, Flat, & Square Wire Winding
Automatic CNC Winding
Bobbin, Layer, & Self-Supporting Winding
Toroidal Hook & Shuttle Winding
Thermoplastic & Thermoset Overmolding
Impregnation, Casting, & Potting
Void-Free Vacuum Potting
NASA Certified Soldering
Wire Prep & Harness Assembly
Injection Molding
Metal & Plastic Fabrication
Lean Manufacturing Principles
Complete, In-House Machine Shop
Poka-Yoke "Mistake Proofing"

ITAR INTERNATIONAL TRAFFIC IN ARMS REGULATIONS

IATF 16949

ISO9001 CERTIFIED

REGISTERED AS9100



ENGINEERING

3-D CAD Modeling
3-D Printing
Mechanical Design & Packaging
Rapid Prototyping
Magnetic Simulation Software
Mechanical, Thermal & FEA Analysis
Plastic Mold Flow Simulation
APQP Project Management

QUALITY & COMPLIANCE

AS9100 & IATF16949 Certifications
ITAR Compliance
Regulatory Agency Approvals
PPAP & First Article Inspection
SPC Data Collection

TESTING & LAB CAPABILITIES

Automated Transformer Testing
Medical Safety Testing
High Voltage/Partial Discharge Testing
Full Load & Temperature Rise Testing
2-D/3-D Microfocus X-ray Inspection
Digital Microscopic Inspection
MIL-STD-202 In-House Qualification Testing
Mechanical, Shock & Vibration
Burn-In & Life Testing
Thermal Shock & Temperature Cycling
Humidity, Salt Fog, & Solderability
Moisture Resistance & Seal Testing

PARTNER | SOLVE | DELIVER®

Our Approach

PARTNER // TEAMWORK

Dig deep into the customer's project and develop relationship through our thought leadership, expertise, team, and global footprint.

SOLVE // UNDERSTAND

Capabilities, lab, size, shape, power management, ranges, frequency, and more around how our capabilities can provide efficient, productive, designs & products.

DELIVER // QUALITY

Help customers win through our diverse products, dynamic capabilities, reliable high-quality magnetics solutions, and customer driven innovation and service.

Our Process

Pre-Qualify — INTERACT — Collaborate — FEEDBACK — Work — DEVELOP — Deliver

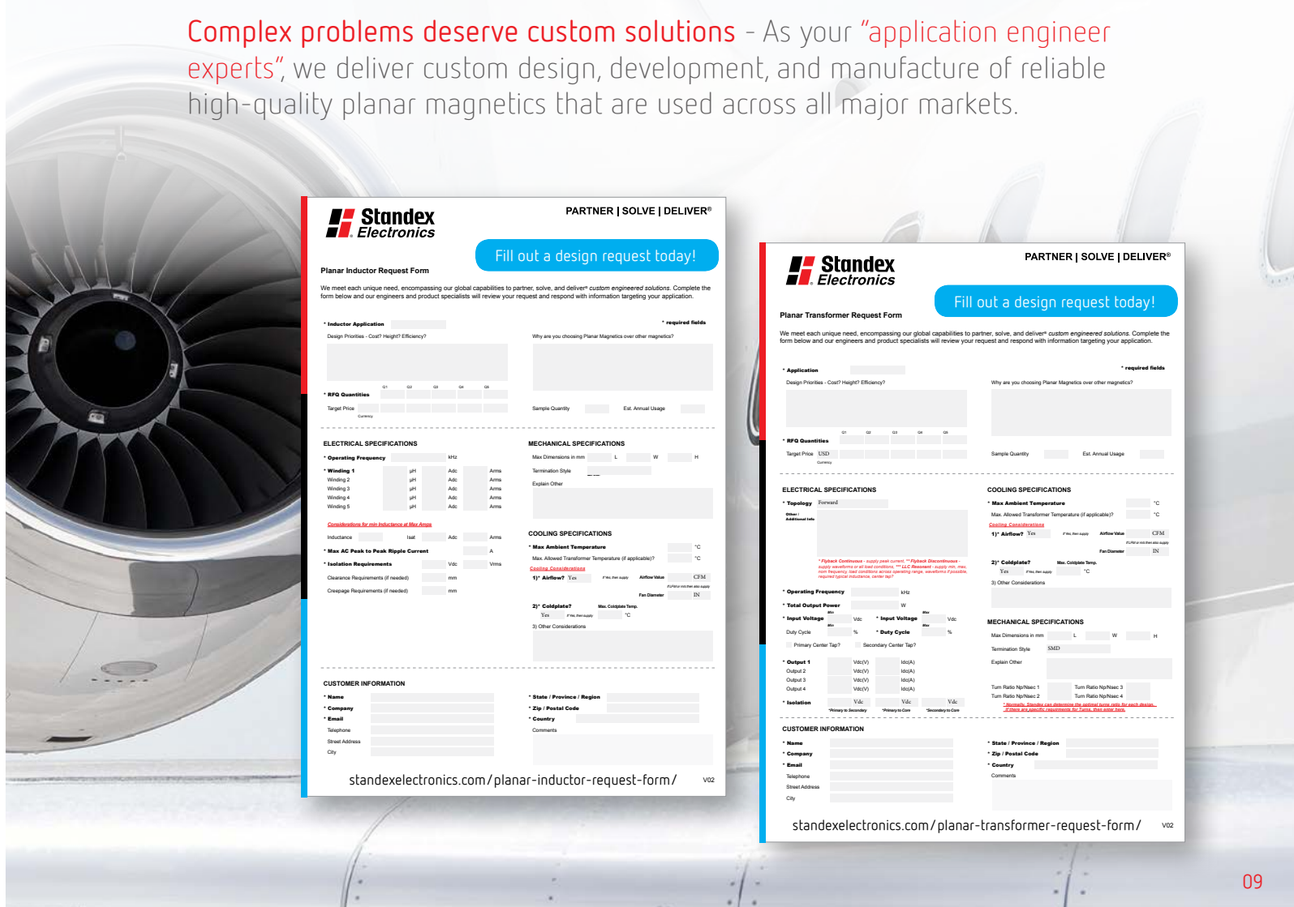
- Understand Application
- Define Design Targets
- Define Topology
- Why Planar?
- Efficiency & Power Requirements
- Operating Frequency
- Thermal & Cooling Conditions
- Isolation Considerations
- Cost Targets Vs. Efficiency

- Open Engineering Team Dialogue
- Footprint Negotiations
- Optimize Efficiency
- Electrical & Thermal Modeling
- Preliminary Design Approval
- Identify Custom Components
- Specify Terminations
- Thermal Management Design
- Generate Print & Quotation

- Final Design Approval
- Generate BOM
- Order Material
- Queue Samples
- Sample Build
- EL Test & Report
- Application Testing
- Feedback
- Iterations If Necessary

- Production Order
- APQP
- FAI
- DFMEA & PFMEA
- Line Audit
- PPAP
- Delivery
- Sustaining Engineering

Complex problems deserve custom solutions - As your "application engineer experts", we deliver custom design, development, and manufacture of reliable high-quality planar magnetics that are used across all major markets.



Standex | Smart.

"Planar magnetics offer improved power density and performance compared to equivalent wire wound designs."

PLANAR MAGNETICS

ADVANTAGES OF WORKING WITH STANDEX ELECTRONICS

Global Design and Manufacturing

- Experienced with creating custom solutions for partners across the globe
- Capable of leveraging global supply chains on behalf of our partners
- Global manufacturing locations provides options regarding cost vs timing

Ready and Willing to Grow with Our Partners

- Part of a $1B publicly traded corporation with access to capital markets
- Able to make investments to grow our capacity along with our partners
- Forward focused supplier that you can depend on in the long run

Deep Technical Expertise

- Over 100 years of custom magnetics design experience
- Capable of proving design calculations, simulations and prototype samples
- Portfolio of technical solutions developed through years of custom designs
  - US Patent 7,129,809 for surface mount header
  - US Patent 7,460,002 for custom terminal design
  - Optimized footprints & thermal management
  - Custom encapsulation/potting methods to meet isolation requirements

Broad Product Portfolio and Capabilities

- Experienced manufacturer of both planar and traditional magnetic designs
- Wide power range of 25W to 250kW and frequency range of 20kHz-1MHz+
- One-stop shop able to fully test components to meet rigorous certifications

ADVANTAGES OF STANDEX ELECTRONICS' DESIGN APPROACH

Minimized Footprint

- Planar better utilizes core space, enabling more compact magnetic designs
- Standex uses ER Cores, which allows most compact designs in the industry
- Flexible termination designs allow fit into existing space with minimal redesign

Optimized Performance

- High power density enables 99%+ efficiency with significantly lower material
- Optimized core cross section and low turn count minimizes losses
- Compact design better allows heat transfer out of components

High Reliability

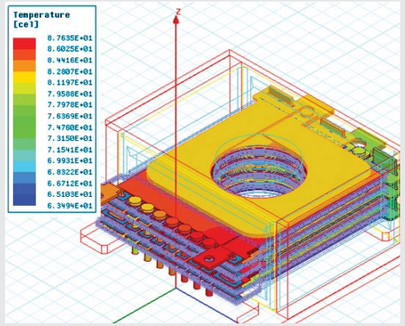
- Elimination of hand winding reduces part to part variation
- Use of PC boards and encapsulation methods allow high isolation
- ER core geometry reduces EMI that may interfere with sensitive equipment of custom designs

Partner in Innovation

- Experience in fully custom designs for customers large and small
- Plastic molding expertise, enabling unique isolation and value-add solutions
- Capable of providing full thermal management designs, as needed

That's **Standex** | Smart.

"Planar technology is making headway in some of the most demanding applications and emerging markets."



We offer **engineered planar magnetics solutions** for a **broad spectrum of product applications** in all major markets. Battery charging, electric vehicles, solar inverters, aviation, healthcare, and industrial markets are just some of the areas where planar technology is gaining ground.

APPLICATIONS

Automotive, Electric & Hybrid Vehicles
Renewable Energy - Wind & PV Systems
Aerospace & Military (high reliability & repeatability)
Welding, Lasers & Test Equipment
DC-DC Converters
AC-DC Resonant Designs
Appliance
Battery Charging (12V, 24V, 48V, 1-10 KW)
Switch Mode Power Supplies
Distributed Isolated Power
Feedback Control
High Current POL Converters
High Power LED Lighting & Industrial Power
Isolated Inverters
Isolated (unregulated) Bus Conv. (Vout 9-12V)
Server – Data Centers (400VDC)
Telecom ("Sweet Spot" 36-72 Vin 40-250W)

FAST CHARGER

Power Range 15kW - 100kW

- Main Transformer
- Resonant Inductor

BATTERY MANAGEMENT SYSTEM

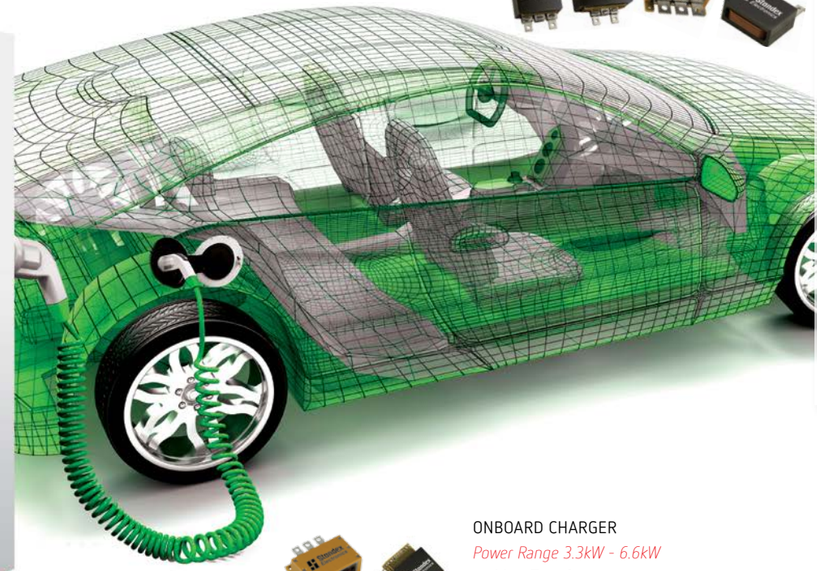
Power Range 25W

- Transformer

DC/DC CONVERTER

Power Range 1kW - 7kW

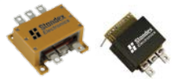
- Main Transformer
- Output Choke
- Resonant Inductor



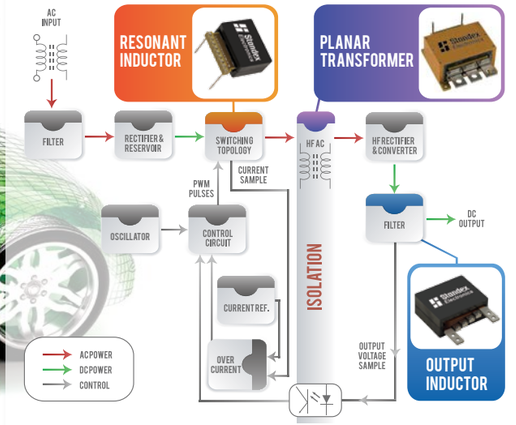
ONBOARD CHARGER

Power Range 3.3kW - 6.6kW

- Main Transformer
- Resonant Inductor



SWITCH-MODE POWER SUPPLY
// PLANAR MAGNETICS APPLICATIONS //



"Planar transformers and inductors are the ideal solution for efficient SMPS applications."

CUSTOMER CONFIGURATIONS

Complex problems deserve custom solutions - "Inductors available for design in all packages."

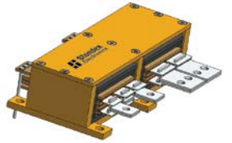
(1) Size Is Preceded By "p" for Transformer Or "i" For Inductor
(2) Patented (U.S. PAT. 7,129,809) Header Design With Superior Thermal Management, Coplanarity, And Repeatable Height
(3) Current Rating Is 30% Higher For Through-Hole Applications
(4) Length (L) May Vary Depending On Terminals / Height (H) Depending On Input / Output Requirements

Standex offers **hundreds of multi-layer PCB's and lead frames that can be custom configured** for your custom power requirements.

CUSTOMER CONFIGURATIONS

- Soft switching, single or multiple outputs
- Wide switching frequency range
- Input / output voltages
- Optimized turns ratio
- Thermal solutions heat sinks, etc.
- Multiple terminal / termination options
- Inductors available for design in all packages
- Value-added assemblies

Dual heatsink package with transformer and DC output inductor



Surface mount solution with increased creepage and clearance

Custom control transformer with multiple outputs

Custom Configurations / Standard Sizes

CUSTOM CONFIGURATIONS
Inductors, >30kW, Thermal Solutions, and Custom Terminations

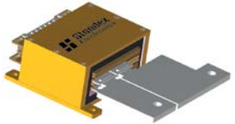
HIGH POWER 10kW-250kW
SIZE 900, 2100, 4000

MID POWER 1kW-10kW
SIZE 220, 350, 560

LOW POWER 10W-1kW
SIZE 035, 055, 075, 110, 135

Custom 6kW transformer with custom primary and secondary connections to accommodate customer packaging

Custom heavy style busbar terminals for high current connection and thermal management



DC output inductor with narrow footprint and custom heatsink

Standex | Strong.

LOW POWER // 10W-1kW

"High Frequency Efficiency"

Size 025-135 is ideally suited for low power applications with an optimal power range of 10W-1kW. This size offers volumetric efficiency with low AC losses in a low profile, ultra compact package, as well as excellent repeatability and thermal management characteristics.

TYPICAL PACKAGE RATINGS - APPLICATION DEPENDENT

Optimum Power Range: 10W - 1kW

Current Rating Max.: 5-100A (+30% for THT)

Optimum Frequency Range: 300 - 500kHZ

Mounting Options:

Surface Mount (SMD), Through-Hole (THT)

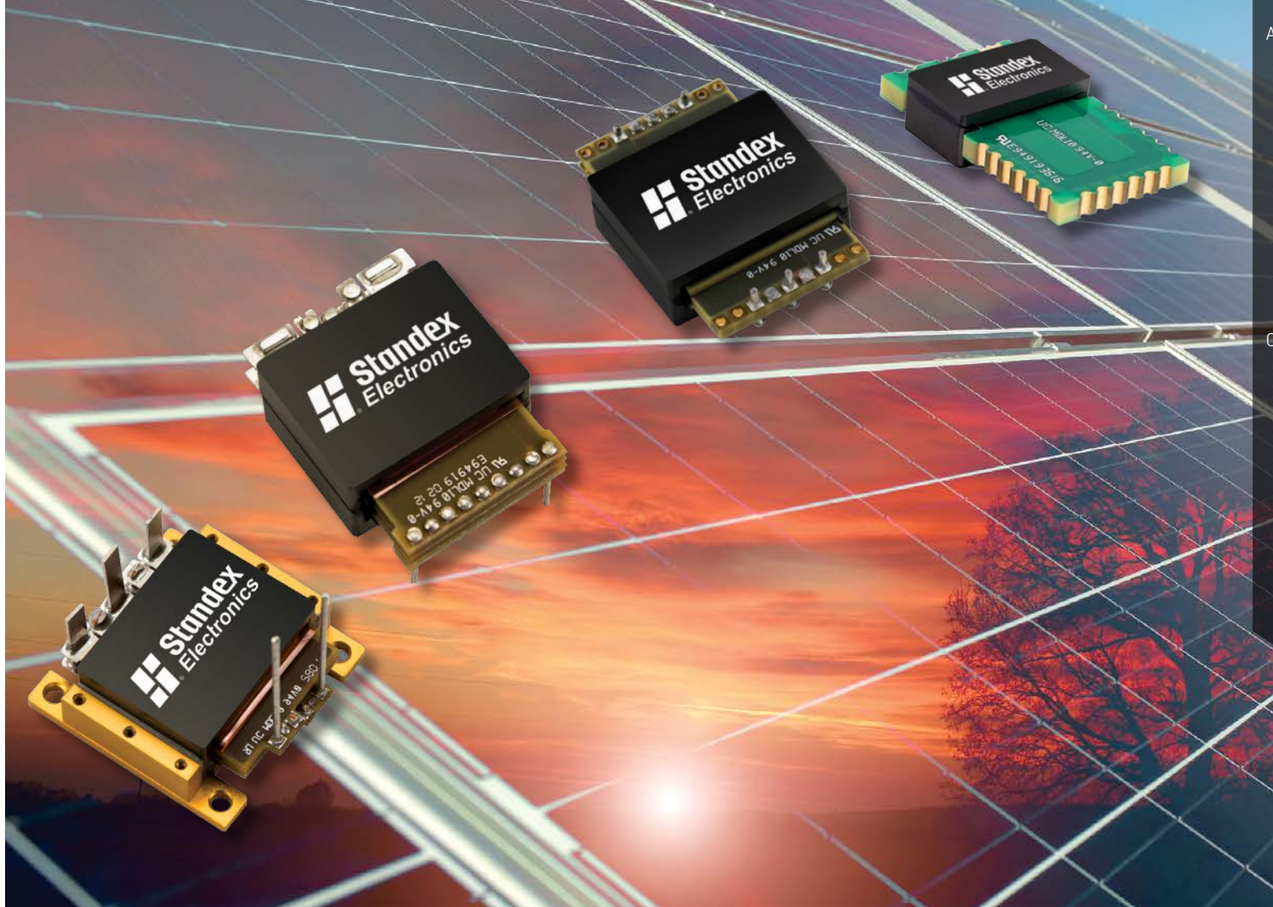
Topologies:

Forward, Flyback, Full Bridge, Full Bridge (ZVS), Half Bridge, Half Bridge (ZVS), Push-Pull

Typical Dimensions:

L	W	H
17-45mm	16-32mm	6-20mm

Length (L) May Vary Depending On Terminals
Height (H) Depending On Input & Output Requirements



APPLICATIONS

- Renewable Energy - Photovoltaic Systems
- Aerospace & Military (high reliability & repeatability)
- Test Equipment
- Switch Mode Power Supplies
- Distributed Isolated Power
- Telecommunications
- Battery Management Systems
- Automotive, Electric & Hybrid Vehicles

CUSTOMER CONFIGURATIONS

- Soft switching, single or multiple outputs
- Wide switching frequency range
- Input/output voltages
- Optimized turns ratio
- Thermal solutions heat sinks, etc.
- Multiple terminal/termination options
- Custom footprints for isolation requirements

That's **Standex** | Strong.

Input Voltage	350-750VDC	Minimum Isolation Voltage	
Output Voltage/Current After Rectification	2.5kW typ. 3kW surge	Primary To Secondary And Core	2500VAC for 1min
Output Voltage/Current After Rectification	28.4VDC/83A, 100A surge	Secondary To Core	500VDC
Turns Ratio - Np/Ns	16/2+2T	Primary Inductance, Np, Min.	1792µH
Switching Frequency	100kHz	Primary Resistance, Rdc, Np, Max.	22mOhm
Duty Cycle At Low Input	80.0%	Secondary Resistance, Rdc, Ns, Max.	1mOhm (0.5+0.5mOhm)
Efficiency At Full Power (Calculated)	99.1% (21W losses)	Leakage Inductance 1-2/3-4-5 Shorted, Typ.	1.5µH
Baseplate/Heatsink Temperature Max.	+85°C	Weight Range	150-400grams
Mounted On Heatsink With Max. Temp.	+90°C		

NOTES:

1) FOR OPTIMAL PERFORMANCE A THERMALLY CONDUCTIVE SUBSTRATE BETWEEN FERRITE AND HEATSINK SHOULD BE UTILIZED
2) PATENTED TERMINALS AVAILABLE FOR SPLITTING HIGH CURRENT WINDING

TRANSFORMER DESIGN | EXAMPLE - PQC2014

ELECTRICAL SPECIFICATIONS

Topology	Full Bridge ZVS
Input Voltage	110-150VDC
Output Voltage/Current After Rectification	3100VDC/0.5A (1.55kW max)
Turns Ratio Np / Ns1 + Ns2	4T/60T + 60T
Switching Frequency	100kHz
Duty Cycle At 150 VDC	95%
Efficiency At Full Power (Calculated)	99.3% (11W losses)
Ambient Temperature Max.	+20°C
Airflow Temperature, Speed (Recommended)	50CFM

Temp. Rise Hot Spot Heatsink, Max.	+53°C
Minimum Isolation Voltage	
Primary To Core	500VAC
Secondary To Primary And Core	3000VDC
Primary Inductance, Np, Min.	100µH
Primary Resistance, Np, Max.	2mOhm
Secondary Resistance, Ns1 or Ns2, Max.	800mOhm
Leakage Inductance 1-2/3-4-5 Shorted, Typ.	0.2µH
Weight Range	150-400grams

NOTES:

1) FOR OPTIMAL PERFORMANCE A THERMALLY CONDUCTIVE SUBSTRATE BETWEEN FERRITE AND HEATSINK SHOULD BE UTILIZED
2) PATENTED TERMINALS AVAILABLE FOR SPLITTING HIGH CURRENT WINDING

Standex | Strong.

HIGH POWER // 10kW-250kW

"Renewable Energy "

Size 900, 2100, and 4000 are ideally suited for high power applications with an optimal power range of 10kW-250kW. This size offers volumetric efficiency with low AC losses in a low profile, ultra compact package, as well as excellent repeatability and thermal management characteristics.

TYPICAL PACKAGE RATINGS - APPLICATION DEPENDENT

Optimum Power Range:	10kW - 250kW
Current Rating Max.:	500A (+30% for THT)
Optimum Frequency Range:	40 - 125kHZ

Mounting Options:

Through-Hole (THT)

Topologies:

Full Bridge, Full Bridge (ZVS), Half Bridge, Half Bridge (ZVS), Push-Pull, Resonant

Typical Dimensions:

L	W	H
120-145mm	94-111mm	38-45mm

Length (L) May Vary Depending On Terminals
Height (H) Depending On Input & Output Requirements

APPLICATIONS

- Fast Charging
- Electric & Hybrid Transportation
- Renewable Energy - Wind & Photovoltaic Systems
- Aerospace & Military (high/repeat reliability)
- Welding, Lasers, & Test Equipment
- DC-DC Converters
- AC-DC resonant designs
- Switch Mode Power Supplies
- Distributed Isolated Power
- Grid Energy Storage

CUSTOMER CONFIGURATIONS

- Soft switching, single or multiple outputs
- Wide switching frequency range
- Input/output voltages
- Optimized turns ratio
- Thermal solutions heat sinks, etc.
- Multiple terminal/termination options
- Value-added assemblies

That's Standex | Strong.

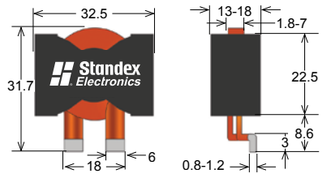
PQ SERIES INDUCTORS // 0.9-6.0µH, 80A Max

"Fixed Power Inductors"

Size PQ32 fixed power inductors w/ferrite core are used in switching power supplies, DC/DC converters, FPGA and low/high profile current, high current POL converters, feedback control, overload sensing, load drop and shut down detection.

PQ32 (SMD/THT)

Inductance at Rated Current:	0.9 - 6.0 µH
Rated Current Typ.:	45 -60 A
Height Max.:	11 - 18 mm
Mounting Options:	31.7 x 32.5 mm



PQ3218 - 6R0 - 50 - T - R

1 2 3 4 5 6

Available in Tape & Reel Packaging

CUSTOMER CONFIGURATIONS

1. Core style and size
2. Typical height in mm
3. Min. inductance in "µH", "R" = decimal point
4. Typical Amp rating
5. Terminal style - "G" = SMT, "T" = Through hole tabs
6. Optional packaging "R" = Tape & Reel
