## Tallysman 33-5394SDK-0 Smart Precise Heading GNSS Antenna Software Development Kit

The Tallysman 33-5394SDK-0 Smart GNSS Antenna Software Development kit is an evaluation/development package for the 33-5394-09-10 Smart Precise Heading GNSS Antenna. The 33-5394-09-10 is a Dual Band (L1/L2) Smart GNSS Antenna that integrates a Tallysman Accutenna® dual feed ceramic patch, with eXtended Filtering, with a u-blox ZED-F9P High Precision (cm level) GNSS receiver and a u-blox D9S L-Band Corrections receiver. The 33-5394-09-10 Smart GNSS Antenna connects to a host system via an RS-422/485 serial interface with RJ45 connector.

The 33-5394SDK-0 includes one 33-5394-09-10-05-PC0 antenna, one 33-0095-11 RS-422/485 to USB Bridge, TruPrecision evaluation software, and 60 day complementary access to u-blox PointPerfect PPP-RTK Augmentation service.

## GNSS Coverage

GPS/QZSS-L1, GPS/QZSS-L2, GLONASS-G1, GLONASS-G2, Galileo-E1, Galileo-E5b, BeiDou-B1, BeiDou-B2, L-band correction services

## ANTENNA APPLICATIONS

- Autonomous Driving
- Smart Agriculture
- Robotics
- UAV

## TRUPRECISION SOFTWARE

TruPrecision is a Windows based application for evaluating Tallysman's Dual Band Smart GNSS antennas. It provides the following benefits:

- Simple mechanism for associating u-blox PointPerfect service with target Smart GNSS Antenna
  - Sign-up
  - License Key download and application
- Satellite Signal Strength Map

- Logging
  - Type of Logs
  - Troubleshooting
    - Serial Data
    - Protocol
    - NMEA
    - RINEX
  - Log Viewer
- Easy configuration and monitoring of Tallysman Smart GNSS Antennas

## 60 DAY COMPLEMENTARY U-BLOX POINTPERFECT AUGMENTATION SERVICE

The 33-5394SDK-0 showcases the u-blox ZED-F9P High Precision GNSS receiver, which attains cm level accuracy over large geographic regions using augmentation information from u-blox's PointPerfect Service. This is a subscription service, with multiple options for usage. Included in the 33-5394SDK-0 package is 60 days of unlimited access to L-Band or IP-Network access.
