

MINI-SAS HIGH DENSITY

Connectors & Cable Assemblies

TE Connectivity's (TE's) Mini-SAS HD (high density) product family includes compact, high-speed I/O solutions for SAS applications: storage, rack-mount servers, workstations, storage racks, high performance computing, HBAs (host bus adapters), RAID (redundant arrays of inexpensive disks), switches and more. The product family supports speeds up to 12 Gb/s and includes the following interfaces:

- Internal receptacles and copper cable assemblies
- External receptacles and copper cable assemblies

The interfaces are adopted for the SAS-2.1 and SAS-3 standards. The reduced size of the interconnects saves additional 30% to 50% PCB space; a low profile PCIe card can accommodate 4 Mini-SAS HD connectors versus 2 SAS connectors.

Internal Mini-SAS HD Connector

TE's **internal** Mini-SAS HD connector is a 12 Gb/s high-density, high-speed interface capable of supporting an aggregate data rate of 48 Gb/s per connector (12G x 4 lanes) with a version capable of transferring an aggregate data rate of 192 Gb/s. Designed to be approximately 30 % smaller than conventional internal Mini-SAS connectors, the internal Mini-SAS HD connector enables you to save precious PCB space. Additionally, the connector has been adopted by SAS 2.1 and SAS 3 specifications.

Featuring both right angle and vertical orientations, TE's internal Mini-SAS HD interconnects suit a variety of architectures in multiple applications: enterprise storage, high-performance computing, networking and data centers. The connector supports direct passive and active copper cable assemblies.

Internal Mini-SAS HD Cable Assembly

TE's **internal** Mini-SAS HD cable assembly offers system designers with a high speed connection packaged in an extremely flexible, small design. Performing at 12 Gb/s per lane at four lanes, the product transfers data at a total rate of 48 Gb/s. Paired with our internal Mini-SAS HD receptacle, the connector can drive higher aggregate data rates of 192G.

Designed with ultra-slim Madison Cable brand TurboTwin cable and a short 18mm connector (plug), the cable assembly improves airflow while saving additional PCB space. These advantages are critical for internal, inside-the-box applications that demand efficient space usage.

The cable assembly is available in multiple lengths ranging from .3m to 1m and is designed for reliability through use of an abrasion- and cut-resistant cable jacket. This jacket additionally shields isolation to maintain signal integrity.
