Enterprise Grade Sensors, Gateways and Software

The Internet of Things (IoT) is the next big opportunity for Enterprises. How are you addressing your customers needs for reliable IoT Solutions?

Monnit provides a complete, reliable IoT platform consisting of wireless connected sensing devices and secure, remote monitoring solutions with real-time alerts.

Over 50 Sensor Types Available

Monnit was recently named one of **CRN's 20 Coolest IoT Hardware Vendors** and a **2017 IoT Innovations Award Winner**.

Superior Wireless Range

1,000+ ft. non line-of-sight through 12-14 walls.

Monnit Encrypt-RF™ Security

Integrated security (256-bit exchange and AES-128 CTR).

100% Comprehensive Solution

No additional hardware, software or subscriptions are required.

No Monthly Fees.

Long Battery Life

10+ years powered by 2 AA batteries.

Onboard Data Memory

Store up to 512 readings per sensor.

Future Proof

Over-the-air updates allow products to be updated remotely.

How The System Works

1. Plug in the wireless gateway.

2. Attach sensors to "things" you want to monitor.

3. Manage sensors online and receive alerts for things you want to know.

Order Starter Kits Today!

Kits Available for Immediate Delivery

Don't let the IoT wave pass you by. Visit your reseller / distributor, select a couple of kits to evaluate, and within a few short minutes of receiving them, you will be experiencing the Internet of Things to its fullest.
