

## NEW Rugged and Customized Multi-Band Antennas!

Whether your need is for antennas for utility trucks, public safety, agricultural or recreational vehicles, public transportation or remote monitoring and control, Pulse Larsen has your multi-band solution. For precise navigation our GNSS solutions cover satellite navigation types around the World, for best cellular communication we cover 2G to 5G frequencies including LTE MiMo, and for fast speeds, we have dual WiFi and MiMo options at 2.4/5GHz.

These new multi-band products combine navigation with data transmission for the complete telematics solution. We understand communication is critical. These antennas are built to last, with IP67 weatherproof/UV protection. We also offer extensive ruggedized tamper proof and steelmounted studs and low profile options.

PANTHER (GPSMB5)

ARMADILLO (GPSCP)

FIN (GPSDM)

### Frequencies Available

GPS, GNSS, LTE (MiMo), WiFi (MiMo or dual-band), ISM

### Customize to Your Needs!

- Choose Family Type
- Choose Frequency
- Choose Cable Length
- Choose Connector

RAZORBACK (RAZ)

JAGUAR (GPSLPMB4)

DISC (W4165)

SLPT AND LPT LOW PROFILE SERIES

Choose PulseLarsen as your trusted antenna partner for World Class design, testing and manufacturing of high reliable antenna systems to give you the best connectivity between you, your device and the World!
