Mouser-Backed Dragon Racing Formula-E Team Takes Top 3 Spot, Charges Ahead to Next Race in Argentina

February 4, 2016 – [Mouser Electronics](#), Inc. and the Dragon Racing [Formula E Team](#) are now heading into the fourth race of the FIA Formula E all-electric car racing series – this time in Argentina at the Buenos Aires ePrix. Mouser is sponsoring the Formula E team, along with its valued supplier partners [Molex](#) and [Panasonic](#).

With three races behind them, the team is now in the hunt for the Formula E Championship.

The Mouser-backed team is now ranked 3rd overall, moving up two positions following a stunning 3-4 finish on December 19 in Punta del Este, Uruguay.

Loic Duval, winner of the 24 Hours of Le Mans in 2013, finished 4th in Uruguay, just fractions of a second behind European Formula Master Champion Jerome D’Ambrosio.

This is the second year that [Mouser Electronics](#), the global authorized distributor with the newest semiconductors and electronic components, is sponsoring [Formula E](#) racing.

With just weeks before the Buenos Aires ePrix, set for February 6, team preparations already are in high gear. As these veteran drivers speed toward victory, their cars Number 6 (Duval) and Number 7 (D’Ambrosio) are sporting prominent Mouser branding, along with branding from Mouser’s valued supplier partners, [Molex](#) and [Panasonic](#).

[Formula E](#) is a new global racing series from Fédération Internationale de l’Automobile (FIA), the governing body for world motor sports. Formula E features cars powered exclusively by electric energy and represents a vision for the future of the motor sports industry over the coming decades, serving as a framework for research and development around the electric vehicle, accelerating general interest in these cars and promoting sustainability.

“Like Mouser, Formula E is on the leading edge of new technologies,” said Todd McAtee, Vice President of Americas, Business Development for Mouser Electronics. “We are thrilled to be partnering with Dragon Racing and be supporting a high-tech sport that is paving the way for future automotive technologies. This kind of high-tech auto racing provides the perfect platform to raise awareness for Mouser and our industry-leading partners, Molex and Panasonic.”

After the Buenos Aires ePrix, six more races are planned for the 2015-2016 season. Next the team will travel to Mexico for the Mexico City ePrix on March 12. That will be followed by races in: Long Beach, California on April 2; Paris, France on April 23; Berlin, Germany on May 21; Moscow, Russia on June 4; and London, UK on July 2 and 3. To learn about the series and view a detailed schedule, visit www.mouser.com/formula-e/.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 21 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated many times per day and searches more than 10 million products to locate over 4 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 4 million products online from more than 500 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 500,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

About Dragon Racing

Founded by Jay Penske, Dragon Racing became one of the ten teams competing in the all-electric FIA Formula E Championship after many successful years competing in the North American IndyCar racing series. The accomplishments of the team's key personnel places Dragon Racing in the enviable position of having one of the most experienced teams in the Formula E Paddock. Collectively the team's crew has over 150 years of racing experience, with over 275 race wins, 24 Indy 500 victories, and 17 series championships.
