

For Immediate Release

Mouser-Sponsored Rebellion Race Team Continues Winning Streak

November 24, 2014 – [Mouser Electronics](http://www.mouser.com), Inc., the global authorized distributor with the newest semiconductors and electronic components, congratulates the 2014 [Rebellion Racing](http://www.rebellionracing.com) Team for a stunning victory in Bahrain in the seventh round of the 2014 FIA World Endurance Championship.

The Mouser-sponsored Rebellion Racing team achieved a seventh LMP1-L win in seven races. Mouser is sponsoring the team in partnership with [LEMO](http://www.lemo.com), a global leader in the design and production of precision custom connection solutions. The team's primary sponsor is Rebellion, a Swiss manufacturer of high-end watches.

The Rebellion R-One Toyota cars, #13 and #12 received the checkered flag in sixth and seventh places overall, and finished first and second in the LMP1-L class. It's the third consecutive one-two LMP1-L class finish for the Mouser-sponsored team in three races, following victories in Fuji and Shanghai.

Nick Heidfeld, Nicolas Prost and Mathias Beche secured their victory in the No. 12 car. Andrea Belicchi, Dominik Kraehmer and Fabio Leimer, finished in second place in No. 13. It was an identical finish to their victory at Shanghai two weeks ago.

"We are very happy to see both cars get to the end of the 6-hour race with an almost trouble-free run," said Bart Hayden, the Rebellion Racing Team Manager. "It's been an enjoyable week because we've taken the momentum that we started to pick up in the previous races and carried it forward here. Improvements made with the cars during the weekend are significant and the pace compared to the hybrid factory cars was closer than in the recent races."

For the last race of the season the Mouser-LEMO sponsored team travels to Brazil for the 6 Hours of Sao Paulo, set for November 30. Rebellion Racing won the FIA Endurance LMP1 Team Trophy in 2012 and 2013.

"All of us here at Mouser are expecting a big finish to what has been a spectacular season," said Todd McAtee, Mouser Electronics' Vice President of Business Development. "The team has continued to excel with each race. In racing, the technology is advancing faster than ever before, and that is in keeping with Mouser's commitment to being the distributor known for introducing the newest products and latest technologies across the globe."

Racing is all about speed and endurance, and racing sponsorships are an innovative way for Mouser to communicate its performance-driven business model and promote the newest technologies and how they impact the high-tech world of auto racing. Every advanced, sophisticated component that goes into a race car is all about precision and gaining a performance edge out on the track. Car racing is the perfect vehicle to build top-of-mind awareness for Mouser and its industry-leading manufacturers.

Mouser distributes LEMO's products, including a wide range of push-pull circular connectors and module connector solutions. Known for exceptional quality and reliability, [LEMO connectors](http://www.lemo.com) are ideal for harsh environment, medical equipment, test and measurement instrumentation, telecommunications, audio-video, and other applications. With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 20 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated many times per day and searches more than 12 million products to locate over 4 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 4 million products online from more than 500 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 400,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.
