

## New Product Announcement

# Mouser Now Stocking Würth WE-PP Mini Push-Pull Transformers for Texas Instruments SN6501 Chipset

April 29, 2013 – [Mouser Electronics](http://www.mouser.com), Inc. is stocking new miniature push-pull transformers from [Würth Electronics](http://www.wurth-electronics.com) that are designed for use with the [Texas Instruments](http://www.ti.com) SN6501 transformer driver.

WE-PP push-pull transformers are miniature, high-performance devices with a high isolation voltage of 2.5kV. These Würth devices can be matched with a TI SN6501 transformer driver to create a space-saving, cost-effective solution. SN6501 drives a low-profile, center-tapped transformer primary from a 3.3V or 5V DC power supply. This push-pull monolithic oscillator/power-driver is ideal for small transformers used in a variety of applications, such as RS-485, RS-232, RS-422, I<sup>2</sup>C, or low power LAN. Learn more about SN6501 transformer driver at <http://www.mouser.com/new/texasinstruments/ti-sn6501>. Visit <http://www.mouser.com/new/wurth/wurth-we-pp-transformers> to learn more about Würth WE-PP push-pull transformers.

With its broad product line and unsurpassed customer service, Mouser caters to design engineers and buyers by delivering What's Next in advanced technologies. Mouser offers customers 19 global support locations and stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is updated daily and searches more than 10 million products to locate over 3 million orderable part numbers available for easy online purchase. Mouser.com also houses an industry-first interactive catalog, data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

### **About Mouser Electronics**

Mouser Electronics, a subsidiary of TTI, Inc., is part of Warren Buffett's Berkshire Hathaway family of companies. Mouser is an award-winning, authorized semiconductor and electronic component distributor, focused on the rapid introduction of new products and technologies to electronic design engineers and buyers. Mouser.com features more than 3 million products online from more than 500 manufacturers. Mouser publishes multiple catalogs per year providing designers with up-to-date data on the components now available for the next generation of electronic devices. Mouser ships globally to over 375,000 customers in 170 countries from its 492,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit <http://www.mouser.com>.

### **About Würth Electronics**

The Würth Electronics EMC & Inductive Solutions unit manufactures inductors, transformers, and EMC-components for global customers. The company's success is based on more availability, more service, more presence, and more knowledge to give their customers a "little bit more to make the big difference."

### **Trademarks**

Mouser and Mouser Electronics are registered trademarks of Mouser Electronics, Inc. All other products, logos, and company names mentioned herein may be trademarks of their respective owners.
