Mouser Electronics Sponsors Digi Webinar on Managing and Scaling Remote Networks

June 9, 2020 – [Mouser Electronics](http://www.mouser.com), Inc., the New Product Introduction (NPI) leader empowering innovation, is proudly sponsoring a new webinar from [Digi](http://www.digi.com)® titled “Deploy, Manage and Scale Your IoT Communications Network.” In the webinar, experts from Digi and ElectriCities will teach IT professionals how to gain complete visibility and control over distributed devices, enabling them to manage, grow and secure their networks.

The free webinar occurs at 10 a.m. U.S. Central time on June 18, 2020, and will be available on demand after the event. To learn more about Digi and to register for the webinar, go to <https://www.mouser.com/manufacturer/digi-international/>.

As companies begin to scale their device networks, and can no longer efficiently monitor or update all of their devices, administrators fully understand the importance of a management interface that lets them monitor, manage and update their networks. This 30-minute webinar (followed by a Q&A session) seeks to answer:

- Why automated configuration management is a critical security feature for networks of connected devices.
- How scalability is vitally dependent on the ability to gain visibility and perform mass updates across the entire network.
- How configurable system alerts can give administrators the ability to perform predictive maintenance and enable teams to rest well at night.

In the webinar John Coates, ElectriCities Lead Systems Coordinator, will share how his company uses dashboards to track performance data in real time, and how Digi solutions enable ElectriCities to remotely control generators for temporary coverage when main power fails at a managed site. Stefan Budricks, Digi Product Manager, will provide insights on some of the critical ways in which [Digi Remote Manager](http://www.digi.com)® improves every aspect of deploying a network of Internet of Things (IoT) devices, while making them more secure, simplifying the process of keeping them up-to-date with the latest firmware, and ensuring that companies can keep tabs on them anytime, from anywhere.

To register for the free webinar, go to <https://register.gotowebinar.com/register/7505356938039302925>. For more information about Digi Remote Manager, visit <https://www.mouser.com/new/digi-international/digi-remote-manager/>.

As an authorized distributor, Mouser Electronics is focused on the rapid introduction of new products and technologies, giving customers an edge and helping speed time to market. Over 800 semiconductor and electronic component manufacturers count on Mouser to help them introduce their products into the global marketplace. Mouser's customers can expect 100% certified, genuine products that are fully traceable from each manufacturer.

With its broad product line and unsurpassed customer service, Mouser strives to empower innovation among design engineers and buyers by delivering advanced technologies. Mouser stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is continually updated and offers advanced search methods to help customers quickly locate inventory. Mouser.com also houses data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a Berkshire Hathaway company, is an award-winning, authorized semiconductor and electronic component distributor focused on rapid New Product Introductions from its manufacturing partners for electronic design engineers and buyers. The global distributor's website, Mouser.com, is available in multiple languages and currencies and features more than 5 million products from over 800 manufacturers. Mouser offers 27 support locations around the world to provide best-in-class customer service and ships globally to over 630,000 customers in 223 countries/territories from its 1 million sq. ft. state-of-the-art facilities south of Dallas, Texas. For more information, visit www.mouser.com.

About DIGI

DIGI is a leading global provider of mission-critical machine-to-machine (M2M) and Internet of Things (IoT) connectivity products and services. DIGI helps customers create next-generation connected products and deploy and manage critical communications infrastructures.
