Mouser Electronics and Essentra Components Sign Global Distribution Agreement

April 14, 2020 – [Mouser Electronics](http://www.mouser.com), Inc., the authorized global distributor with the newest semiconductors and electronic components, announces a global distribution agreement with [Essentra Components](http://www.essentra.com), a leading manufacturer of plastic injection molded, vinyl dip molded, and metal items. Through the agreement, Mouser now stocks a [broad selection](#) of Essentra fittings, hardware, electronic components and fasteners, including some of Essentra's key product categories: cable clips and clamps, cable ties, snap lock supports and rivets.

Essentra [cable clips and clamps](#) are available in fixed and adjustable designs and help protect and route wires. These cable clips and clamps feature bundle diameters from 1/16 inch to 2-1/4 inches and multiple mounting methods, including adhesive, screw mount, and snap-in designs. The cable clips and clamps come in plastic and metal versions and are ideal for aerospace, appliances, and electronics applications.

The company's [cable ties](#) are available in lengths from 3 inches to 59 inches, in a variety of materials, including weather-resistant nylon, polypropylene, and stainless steel. The cable ties come in tensile strengths from 18 pounds to 250 pounds and provide beaded and releasable ties that are helpful for temporary applications or where change is needed, such as sign holders, decorations, and security.

Essentra [rivets](#) are easily installed by hand and available for multiple hole sizes and panel thicknesses for holding multiple materials together and fastening items to designated locations. The rivets feature plastic construction and come in a wide variety of styles, sizes, and configurations to accommodate different materials and panel dimensions.

[Snap lock supports](#) aid in supporting, spacing, locking, and guiding of printed circuit boards within electronic applications. These supports eliminate the need for screws and nuts, provide electrical insulation, and are available in several diameters and panel sizes. Essentra snap lock supports are designed to be installed manually and do not require automated assembly equipment.

As an authorized distributor, Mouser Electronics is focused on the rapid introduction of new products and technologies, giving customers an edge and helping speed time to market. Over 800 semiconductor and electronic component manufacturers count on Mouser to help them introduce their products into the global marketplace. Mouser's customers can expect 100% certified, genuine products that are fully traceable from each manufacturer.

With its broad product line and unsurpassed customer service, Mouser strives to empower innovation among design engineers and buyers by delivering advanced technologies. Mouser stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is continually updated and offers advanced search methods to help customers quickly locate inventory. Mouser.com also houses data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a Berkshire Hathaway company, is an award-winning, authorized semiconductor and electronic component distributor focused on rapid New Product Introductions from its manufacturing partners for electronic design engineers and buyers. The global distributor's website, Mouser.com, is available in multiple languages and currencies and features more than 5 million products from over 800 manufacturers. Mouser offers 27 support locations around the world to provide best-in-class customer service and ships globally to over 630,000 customers in 223 countries/territories from its 750,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About Essentra Components

Essentra Components is a leading manufacturer of plastic injection molded, vinyl dip molded, and metal items. Essentra provides a rapid supply of cost-effective but essential products for a variety of applications in industries such as equipment manufacturing, automotive, fabrication, electronics, and construction.
