Mouser Electronics Signs Global Distribution Agreement with Monnit to Deliver Wireless Sensors, IoT Kits and More

January 23, 2019 – [Mouser Electronics](http://www.mouser.com), Inc., the authorized global distributor with the newest semiconductors and electronic components, announces a global distribution agreement with [Monnit Corp.](http://www.monnit.com) Through the agreement, Mouser now stocks Monnit's wireless sensors, Ethernet and cellular gateways, and [Internet of Things](http://www.monnit.com) (IoT) starter kits.

Monnit® ALTA® [wireless sensors](#) are an ecosystem of more than 60 sensor types that detect changes in a wide range of variables such as temperature, water presence, door position, electrical current, and voltages. Monnit's ALTA series devices offer an exceptional range of over 1,200 feet (non-line-of-sight) through more than 12 walls, plus Monnit Encrypt-RF® integrated security and onboard data memory. Monnit ALTA sensors are available in several power options, each providing years of operation.

Monnit [Ethernet and cellular gateways](#) allow Monnit wireless sensors to communicate with the iMonnit® cloud. The globally supported devices use an internet or cellular connection to automatically connect with Monnit's online servers, making the gateways ideal for commercial locations with or without an active internet connection. Graphical iMonnit software allows for complete configuration and customization at a sensor, local network, or client-wide level. The software enables engineers to easily configure the network, view collected sensor data, and configure SMS text, email, or voice alerts online or via the free iMonnit apps for Android and iOS.

Monnit [Internet of Things Starter Kits](#) feature enterprise-grade sensors, gateways and software to address the need for reliable IoT solutions. The kits contain everything needed to begin monitoring a variety of applications such as facilities, agricultural areas, corporate properties, commercial refrigeration, HVAC systems, and server rooms.

With its broad product line and unsurpassed customer service, Mouser strives to empower innovation among design engineers and buyers by delivering advanced technologies. Mouser stocks the world's widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics' website is continually updated and offers advanced search methods to help customers quickly locate inventory. Mouser.com also houses data sheets, supplier-specific reference designs, application notes, technical design information, and engineering tools.

About Mouser Electronics

Mouser Electronics, a Berkshire Hathaway company, is an award-winning, authorized semiconductor and electronic component distributor focused on rapid New Product Introductions from its manufacturing partners for electronic design engineers and buyers. The global distributor's website, Mouser.com, is available in multiple languages and currencies and features more than 5 million products from over 750 manufacturers. Mouser offers 23 support locations around the world to provide best-in-class customer service and ships globally to over 600,000 customers in more than 220 countries/territories from its 750,000 sq. ft. state-of-the-art facility south of Dallas, Texas. For more information, visit www.mouser.com.

About Monnit Corporation

Monnit is a leader in the design and manufacturing of cost-effective, turnkey wireless sensor solutions. Monnit's solutions are used by customers wanting to remotely monitor a variety of variables (including temperature, motion, humidity, and vibration) and receive alerts based on user-defined conditions.
