

For Immediate Release

Mouser Electronics Presents New Resource Site Dedicated to LoRaWAN Technology

December 15, 2020 – [Mouser Electronics](http://www.mouser.com), Inc., the authorized global distributor with the newest semiconductors and electronic components, has created a new resource site dedicated to the LoRaWAN® standard and its capabilities, applications, and related products. Engineers and designers can access the comprehensive new site by visiting <https://resources.mouser.com/lora>.

LoRaWAN is a low-power, wide-area (LPWA) network protocol designed to provide internet connections to battery-operated devices in regional, national, and global networks. The high-performance protocol supports key [Internet of Things](#) (IoT) requirements including end-to-end security, bi-directional communication, mobility, and localization services. The new resource site from Mouser offers a broad range of useful information on LoRaWAN technologies, strategies, and devices, providing designers with a single home for advice and insights.

Through standardization and an accredited certification scheme, the LoRa Alliance® delivers the interoperability needed for LPWA networks to scale, making LoRaWAN the premier solution for global LPWAN deployments. Mouser, as part of the TTI Family of Companies, has partnered with LoRa Alliance to deliver and promote this new standard in networking solutions.

With impressive low-power and security capabilities, the LoRaWAN specification offers a wide variety of use cases with specific nuances for each design opportunity. Mouser's new LoRaWAN resource site includes technical articles, videos, product descriptions, and instructional flipbooks, providing information on how to leverage LoRaWAN connectivity in agriculture, smart cities, [sensors](#), autonomous vehicles, and other applications.

To visit Mouser's new LoRaWAN technology resource site, visit <https://resources.mouser.com/lora>.

As a global authorized distributor, Mouser offers the world's widest selection of the newest semiconductors and electronic components — in stock and ready to ship. Mouser's customers can expect 100% certified, genuine products that are fully traceable from each of its manufacturer partners. To help speed customers' designs, Mouser's website hosts an extensive library of technical resources, including a [Technical Resource Center](#), along with product data sheets, supplier-specific reference designs, application notes, technical design information, engineering tools and other helpful information.

About Mouser Electronics

Mouser Electronics, a Berkshire Hathaway company, is an authorized semiconductor and electronic component distributor focused on New Product Introductions from its leading manufacturer partners. Serving the global electronic design engineer and buyer community, the global distributor's website, [mouser.com](https://www.mouser.com), is available in multiple languages and currencies and features more than 5 million products from over 1,100 manufacturer brands. Mouser offers 27 support locations worldwide to provide best-in-class customer service in local language, currency and time zone. The distributor ships to over 630,000 customers in 223 countries/territories from its 1 million-square-foot, state-of-the-art distribution facilities in the Dallas, Texas, metro area. For more information, visit <https://www.mouser.com/>.
