

| WIRE ROPE & CABLE INSPECTION

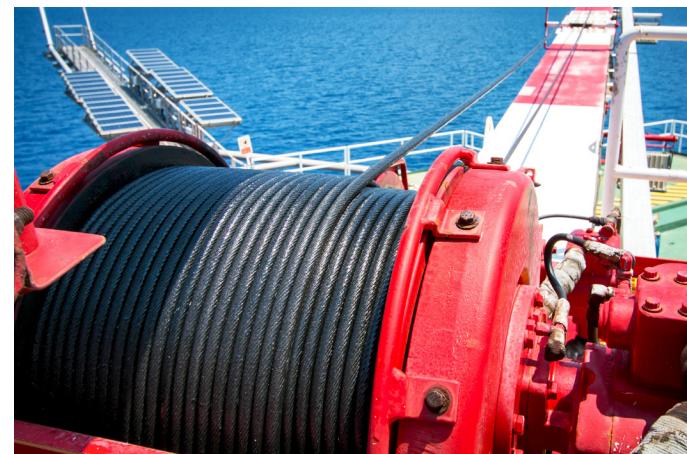

Background

We take it for granted that a lot of our safety systems that rely on wire cable will work flawlessly when needed. What makes this assumption a reality is that there are teams of inspectors whose job it is to routinely validate that cable systems meet the requirements for strength and for corrosion resistance. When you think of it, wire rope and cable is all around us in the form of marine mooring lines, ski lifts, suspension bridges, elevators, cranes and hoists and drilling equipment. Without regular inspections and validation, these systems could easily fail and cause tremendous damage and loss of life.

“There are teams of inspectors whose job is to routinely validate that cable systems meet the requirements for strength and for corrosion resistance in order to make them safe”

Solution

Cable inspectors need to be able to spool out the whole length of cable and be able to precisely pinpoint any trouble spots. Usually they run the cable through a cable tensioning device which measures the cable length and can also be hooked up to other types of detectors for corrosion, stray wires, or other defects. It's imperative that the inspector be able to make a precise location for inspection purposes and a multi-turn absolute is the right tool for the job. It has the added benefit of tracking position even through a power outage so the inspector never loses the location information.

Sensata Technologies, Inc. ("Sensata") data sheets are solely intended to assist designers ("Buyers") who are developing systems that incorporate Sensata products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products. Sensata data sheets have been created using standard laboratory conditions and engineering practices. Sensata has not conducted any testing other than that specifically described in the published documentation for a particular data sheet. Sensata may make corrections, enhancements, improvements and other changes to its data sheets or components without notice.

Buyers are authorized to use Sensata data sheets with the Sensata component(s) identified in each particular data sheet. **HOWEVER, NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER SENSATA INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY THIRD PARTY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT, IS GRANTED HEREIN.
